SAFETY MOMENT

HS2 Safe at Heart Step Up
29th September – 10th October

Mark Wild Message

HS2 Programme Safe at Heart Step-Up 2025

Transitioning safely: from good to great

29 September – 10 October 2025

Control

Safety and
productivity

Reset

HS2

Safe at Heart Step-Up 2025: themes

I care. You count. We matter.

Caring for our future

Our people are at the heart of this step-up and transitioning safely to reset

I care

Guidance

- Aim for inclusion of all
- Capture numbers of attendees
- Encourage active participation and contribution

Every contribution counts

Interventions that

- Break the accident plateau
- Drive improvement
- Reset safely

You count

Guidance

- Success stories
- Innovation and technology
- Spotlight on individual/team role models

What we do this year matters

Shifting the gears from **'good to great'**

We matter

Guidance

- Measurable impact of TSPs so far
- Challenges
- What more needs to be done?
- How can everyone support?

Health matters as much as safety

- Boost our focus on health risk
- Caring for ourselves and each other

Occupational health and wellbeing

Guidance

- Increase in incident reporting
- Increased awareness of health risk
- Physical/mental wellbeing workshops

Framework for delivery

Who?

Our target audience is:

- Delivery management teams
- Frontline operatives across all tiers of the supply chain

When?

29 September – 10 October 2025

- A defined two-week period allows for flexibility in delivery, while driving programme-wide momentum and ensuring all/most shifts can be captured.
- **Planning:** Use Safety Forum and SHWeLT meetings to prepare and coordinate

Where?

Use your existing workforce engagement activities (not limited to):

- Planned health and safety events
- Daily shift brief / Toolbox talks
- Leadership Health & Safety tours

How?

Tailor your messaging:

- Video address from CEO HS2 Mark Wild
- Provide context: Relate to Step-Up 2024 outcomes; Bridge Year/reset goals
- Integrate and align programme-wide core messaging to your local transitioning safely messaging

Incorporate a focus on

- Occupational health and wellbeing
- Motivational messaging at this time of change.

What next? Momentum and impact

I care. You count. We matter.

Before

By end July: Step-up brief shared with SHWeLTs

By 22 Aug: Mark Wild video and additional step-up resources shared, plus HS2 Exec availability to attend events.

Aug – Sept: supply chain develop programme of activity.

By 8 Sept: Contractors to **confirm** their step-up event **arrangements** with SafeatHeartDevelopment@hs2.org.uk

NB Please use **slide 5** and any other slide in this pack to support your own messaging. Other resources have been made available to JV Comms leads.

During

- Make sure leaders are **visible** during step-up period.
- **Record** your step-up events through video, photography, quotes from participants, reflections from leaders
- Capture the **top highlights** demonstrating the impact of your step-up across each of the four themes. (**slide 5**)

After

By 24 Oct: Share your evidence and highlights with the **HS2 Health, Safety and Security Strategy team**.

By mid-Nov: compilation of your highlights shared back with supply chain via annual **Back to Work supply chain brief**.

HS2 Safe at Heart Step-Up Events 2025

Friday 10.10.2025									

What next? Feedback and support

I care. You count. We matter.

To help us to share the outcomes of your step-up events as widely as possible please send the following to **HS2's Health, Safety and Security team** at:

SafeatheartDevelopment@hs2.org.uk

1. Videos, photos and reflections on your safety step-up events with your workforce.
2. Capture the top highlights demonstrating the impact of your step-up across each of the four themes.

Further support with developing your 'step-up' arrangements is also available via the same email address.

I care. You count. We matter.

Local SHWELT Agenda

Agenda	Collaboration
Local Data / Performance • Incident data • Aim High Data • LAMBO / POWRA data	
HSPI requirements • Occupational Health Training • DALUX actions • HSW Monitoring • Observation RCA	
Lessons Learnt Implementation	
Good Practices	

August 2025: South Portal Earthworks

Strengths (What went well)	Weaknesses (What went not so well)
• No significant incidents • Hazard Profiles (Safety and Health) completed as required • Occupational Health Hub sessions going well with good feedback • Collaborative HSW & Operations review of earthworks methods with Ben / Ahmed / David Eke	• T&M / Plant refuelling operatives (Transient Workers) observed working close to active vehicles in holding bay • Compliance with 7-Point PPE is poor. This is not being enforced sufficiently by Ops teams. • HSW monitoring and Inspections not as collaborative as wished due to annual leave / key personnel absent • FREC personnel and equipment review required
Opportunities (Good Practice / Lessons Learnt)	Threats (Future challenges / foreseeable risks)
• Lessons learned from Porous Portal backfill to be shared with North Porous Portal	• Demobilisation risks : work around buried “temporary” services • Emergency Escalation/ Site Incident Control unclear as works transition • Autumn / Winter weather earthworks challenge

Occupational Health Update

Supply Chain Occupational Health Hub

A new installation covering:

- Face Fit Testing
- Dust & Air Monitoring
- Health & Wellbeing
- Hygiene Awareness
- Ergonomics
- HAVS
- Mental Health
- COSHH Awareness
- Lung Function Testing
- Noise Monitoring

Now open!

ALIGN

SUPPLY CHAIN OCCUPATIONAL HEALTH

huk

- Thanks to the black hats for attending the launch of the OH hub and the use of the health matters publication which will help us with our HSPI on Opportunities to train engineers/site workers on health
- Supervisor training modules are available via Brain candy with trackable progress and align supervisors will have begun training by end September.

OUR TOP THREE EXTRAORDINARY ACTIONS

	Action 1	Action 2	Action 3
CHALLENGE	To empower our middle level managers to take increased and visible leadership accountability and clear ownership of Occupational Health, Safety and Wellbeing through the Align JV transitional stage activities and for the teams and activities within their areas of responsibility	Our procedural HSW documentation needs to be suitable for the current risks and should reflect the human performance factors such as fatigue, distraction and the changing environment. Documents have been identified as too long, too complex and difficult to understand, especially considering comprehension levels.	In line with the "HS2 Approach to health and safety" , and to further enhance that "health and wellbeing matters as much as safety" , At a time when Align activities are transforming to our handover phase, an increased focus on health and wellbeing competes with other organisational and personal priorities.
CHANGE RISKS	Establishing clear expectations for leadership, ownership and accountability in delivering continual improvement in the local management of assurance, monitoring, and the identification of unforeseen situations relative to the Top 5 Safety Hazards and Top 3 Health Hazards identified via Hazard Profiles	Information must be clear rather than complex and tailored to the audience to ensure understanding . Document quality must be improved, and therefore the authors must be formally trained . There should be one source of truth with human performance factors adequately considered, and with safety critical information cascaded via structured communication channels	Occupational Health and Wellbeing will have its place high in the Align JV "Transitional Stage Masterplan" . Align JV will raise the profile of occupational health and wellbeing across all personnel within our activities, by creating a renewed focus via extraordinary educational programmes and communications
BUSINESS CONTINUITY	Enhance access to data and performance information for the local leaders - Provide an agreed weekly data digest to each Package Manager / Middle Manager specific to their community and activities - Support communication and understanding of the top Occupational Health, Wellbeing and Safety Hazards specific to the areas of responsibility	Consider output from GMR Align JV Procedural Optimisation review at HS2 SHWELT Working Group with 6 Key Principles for improvement: - Clarity Over Complexity - One Source of Truth - Competence of document preparation process - Purposeful Structured Communication - Account for Human Performance Factors in planning and documentation - Tailor processes and documentation to match the needs and capabilities of all personnel	- Engage our Black Hat and Leadership teams in Occupational Health hazard and awareness education and coaching - Incorporate our top 3 hazards from our Occupational Health Hazard Profiles and monitor threats and opportunities at the point of work - Deliver special editions of internal Safety Matters / Health Matters whole project communications to raise awareness - Identify Occupational Health milestones with local teams to celebrate success and improvement achievements

Track your **top three extraordinary actions** for transitioning safely during FY25/26

Extraordinary Actions Tracker

Action	Description	Key Results (measurable)	Target date	Progress: Notes/Updates
1	Establish the community of our key middle leadership group and launch the objectives and expectations, and to evaluate impact over time via regular forums Enhance access to data and performance information for the local leaders Provide an agreed weekly data digest to each Package Manager / Middle Manager specific to their community and activities Support community communication and understanding of the top Occupational Health, Wellbeing and Safety Hazards specific to the areas of responsibility	- Group objectives, intent, activities established, recorded, ratified, published, and agreed activities commenced and dataset established, and shared - Data cascaded beneficially via Package White Board meetings and SHWELT forums, and measured via Leadership Observation (LAMBO), workplace survey feedback and improved performance measures (HSPI) 90% HSPI targets for observation / corrective actions achieved consistently	30/06/2025 commencing 01/07/2025 to 31/10/2025 31/10/2025	On-Target: Group identified, and have commenced ExCo engagement activities as hosts On-Target: Data requirements to be finalised and agreed On Target: Ongoing improvement in 25/26 HSPI outcomes
2	Consider output from GMR/ Align Procedural Optimisation Review with the identified Six Key Principles for improvement: Use the knowledge gained from the Optimisation review output: - Share via the HS2 SHWELT Safety Culture / simplification of process working group - Develop a sample of documents with consideration of human performance elements - Run a trial optimised documentation across Align JV activities and share findings with HS2 Supply Chain community	- Lead on trial of optimised documentation within a sample of Align activities - Impact and feedback captured in HS2 Safety Culture or Align JV Climate Survey in 2025 - Present outputs and feedback via strategic HS2 programme level SHWELT forums	commencing 01/07/2025 to 30/09/2025 20/12/2025 28/02/2026	On-Target: Deputy Chair of SHWELT Working Group On-Target: GMR outputs discussed at Supply Chain Directors Summit On-Target: Ongoing: discussion with HS2 relating to 2025 Climate Survey.
3	- Engage our Black Hat and Leadership teams in Occupational Health hazard and awareness education and coaching - Incorporate our top 3 hazards from our Occupational Health Hazard Profiles and monitor threats and opportunities at the point of work. - Deliver special editions of internal Safety Matters / Health Matters whole project communications to raise awareness - Identify Occupational Health milestones with local teams to celebrate success and improvement achievements	- Record of Health Hazard Profile information included in records of strategic and local SHWELT, Whiteboard and Lookahead forums - POWRA communications of OH hazards measured by Leadership Observation (LAMBO) - Increased proactive reporting of Occupational Health Exposure via HORACE / HSPI outcomes with celebrated success rewarded and noted.	commencing 01/06/2025 to 01/10/2025 31/08/2025 31/10/2025	On-Target: Online OH Modules developed. 1st module delivered with supervisors On-Target: Increased OH focus in Board papers On-Target: OH HazPro visualised via C1 SHWELT and Supervisory Forums On Target: "Health Matters" newsletter due for publication w/c11/08/25

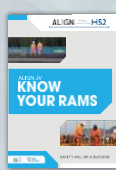

SUPERVISORS DEVELOPMENT

The Frontline Supervisors Development programme to be supplemented with a new 'KNOW YOUR RAMS' programme and Occupational Health awareness training which will support the POWRA's and HSPi's in their effectiveness.

HAZARD & REHEARSAL ACADEMY

The Hazard & Rehearsal Academy to host a series of 'Learning Together' events such as Aim High Data days, High Potential event learning days, 6 Major Risk days throughout a 'Safety is Success' fortnight.

03 SUPERVISORS DEVELOPMENT

04 HAZARD & REHEARSAL ACADEMY

05 HUMAN FACTORS

A prioritised emphasis on producing 'real time' learning alerts via texts / WhatsApp, bulletins and other means for more immediate communications and monitor results accordingly.

SAFETY COMMUNICATIONS

SAFETY PERFORMANCE

A renewed focus on simplifying and completing the HS2 HSPi's by stepping up workforce forums which feed HSPi's that will be hazard profiles that produce learning alerts.

A re-focused OH year concentrating on Powered Production Equipment health risks and the Silent Voices movement to drive active & open well being engagements.

OCCUPATIONAL HEALTH & WELL BEING

A re-focused Human Factors programme to concentrate on each business i.e. Shafts, CVV and Earthworks, Tunnelling and South Heath Cutting

HUMAN FACTORS

OCC HEALTH RISK MANAGEMENT

A drive to reduce risk throughout the project with renewed 'Threat and Error' emphasis supported by a Human Factors week to help transition from the projects main activities.

HSPI

HS2 Clarification: Guiding Principles

- HSPIs are designed to be challenging to help raise the bar across the programme
- The target score of 2.3 is an end-of-year goal—not a monthly minimum
- We recognise that some criteria will take time to implement and embed
- Strong performance is shown through steady month-on-month improvement

HAZARD PROFILE

1. HSPI Leading - *Effective use of Hazard Profile to manage proactive assurance and mitigation*

HS2 HSPI Target	Mar-25	Apr-25	May-25	Jun-25	Jul-25	Aug-25	Sep-25	Oct-25	Nov-25	Dec-25
	2.2	2.3	2.3	2.3	2.3	2.3	2.3	2.3	2.3	2.3
Leading (hazard profiles)	3.00	1.66					2.20		2.60	

Range	Revised Criteria	Score	Definitions
1	Both OH and Safety Hazard profiles on Horace and reviewed with the Senior HSS Manager.	1.00	Hazard profiles are suitable and sufficient and are current for each subplot / area of work or work activity. There is evidence that this has been reviewed with the Senior HSS Manager.
	Both OH & Safety Hazard profile created for each sub-lot/area specific to the works planned in any rolling 3-month period & linked to your assurance plan.	1.33	Hazard profiles are current for each subplot / area of work or work activity. Along with the evidence for 1.00 above, there is also evidence of where an assurance plan is linked to the Hazard Profiles risks and the assurance plan is evidenced as being delivered.
	Evidence of look forward and planning for the upcoming hazards.	1.66	Evidence that the Hazard Profiles include forward risks and evidence of the planning for these risks.
2	Evidence that the JV has reviewed all the OH and Safety Hazard Profiles and actions are assigned and measured for effectiveness.	2.00	Evidence of actions are effective with details of how and when they are completed or progress to date. If actions are not effective, there is a review, and these are revised and updated.
	Evidence Senior Management have oversight of the effective use of hazard profiles and manage proactive assurance and mitigation	2.20	Evidence that JV/PC are reviewing the information monthly independently of HS2 e.g. contract level SHWeLTs to show they have reviewed all the Hazard Profiles for each of the risks identified and there is evidence of a strategic programme of actions to address all the risks. This should include evidence of collaborative meetings with the appropriate attendees, not just H&S involved.
	Evidence of a positive impact e.g increase in positive observations / reduction in incidents based on frequency rates of incidents and injury criteria met.	2.60	Dashboard or similar showing at least 3 months of positive trending across the top 5 hazards identified by the JV.
3	Zero incidents against one or more of the top 5 hazards during the last 3 months	3.00	Dashboard or similar showing that there have been zero HIPO or level 3 and above incidents against one or more of the top 5 hazards recorded in the last 3 months

Impact of Accidents on HSPI Scores

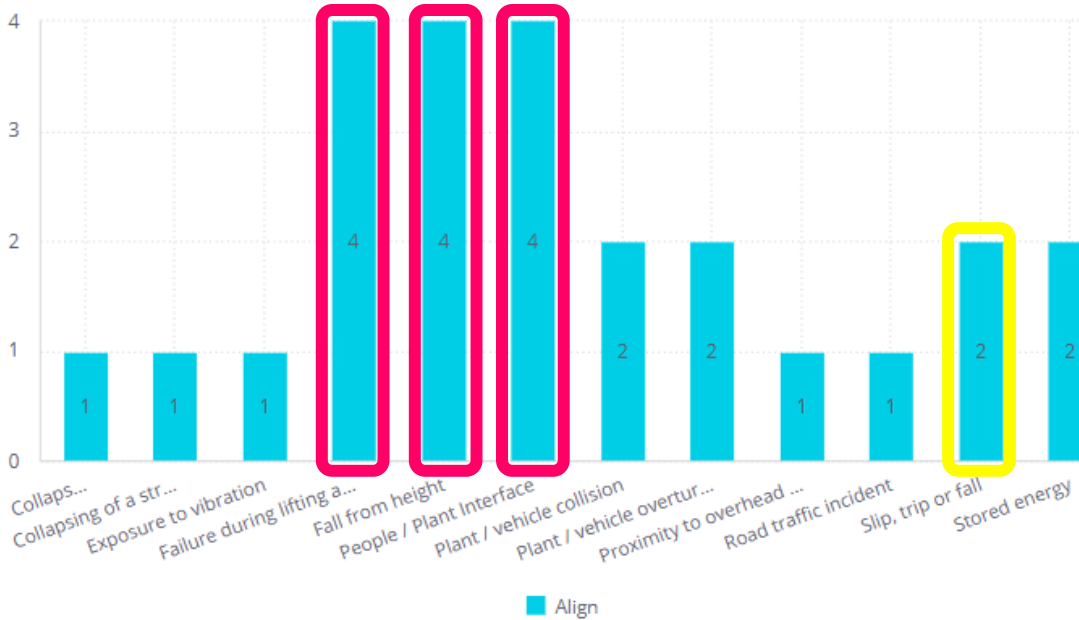

Range	Revised Criteria	Score	Definitions
3	Zero incidents against one or more of the top 5 hazards during the last 3 months	3.00	Dashboard or similar showing that there have been zero HIPO or level 3 and above incidents against one or more of the top 5 hazards recorded in the last 3 months
