1

PREPARATION

ALIGN

WHAT TO SAY:

You must personally understand the message you want to give.

HAVE A PLAN OF DELIVERY CLEAR IN YOUR MIND:

Write a list of key messages or highlight Point of Work briefing prompts.

BE POSITIVE:

Identify risks but address these with positive references to a safer way to work. Risk aware not risk averse = effective risk management.

READINESS

2

WHAT AM I LIKELY TO BE ASKED?

See it from your audience's point of view and prepare.

WORKFORCE INVOLVEMENT:

Input from the workforce in preparing the Point of Work briefing should always be encouraged if possible.

BE POSITIVE:

Communication / engagement = ownership and pragmatic controls.

SAFETY WILL BE A SUCCESS

aim
high

Safe
at heart

TIME:

Set aside enough time to do the briefing - rushing will help no-one.

EFFORT AND FOCUS:

Take the Point of Work or any briefing seriously - it is a key part of everyone's responsibilities.

Fundamental = demonstrates personal accountability and responsibility.

4

RESOURCES

FORMS:

Ensure you plan and know that the equipment, plant and tools are available to do the work.

WHEREABOUTS:

Know where the job will take place, where other jobs are and where equipment and plant will be.

Ensure pre-use inspections of tools / plant are considered as part of the briefing and that all tools / plant are safe to use (no shortcuts).

SAFETY WILL BE A SUCCESS

**THE BEST PLACE TO BRIEF!**

Always at the place of work.

Point of Work briefings should always be given at the place of work. They must visually explain and ensure that everyone is familiar with the content, the site and it's potential hazard's.

If the surroundings are too noisy, ask for any plant / equipment to be shut down temporarily.

Positive = visual briefing = final hazard / risk sense check with team in a "familiar environment".

'MEAN IT'**HOW YOU SAY IT:**

How you deliver and present the briefing is just as important as what you say - keep it simple, speak clearly and say it and mean it!

CONFIDENCE AND CREDIBILITY:

Deliver it with confidence and authority - walk and demonstrate what work / equipment hazard's physically exist and ensure that you involve everyone. Use sketches to assist communication if required.

SAFETY WILL BE A SUCCESS

KNOW WHO YOU WILL SPEAK TO:

Understand the abilities and competencies of the workforce.

COMMUNICATION:

If your team are non-English speaking give time to prepare how you will get the message across and use a translator if necessary for more complex messages. Ensure that you physically demonstrate at the Point of Work the potential hazard's.

Fundamental = engagement, collaboration, consulting and feedback (= ownership).

8

ASK YOUR AUDIENCE

OPEN QUESTIONS:

Ask the audience to take part / engage in the briefing and each individual to run through their understanding of what you have said.

CLOSED QUESTIONS:

Are less revealing of understanding and avoid Yes / No answers.

UPDATES:

Ask the workforce to advise you if the work changes, and needs revision and re-briefing.

WATCH, LISTEN AND CHALLENGE

MONITOR CAREFULLY:

Watch for reactions.
Look for sign's of interest and boredom.
Make eye contact between individuals in the group.

SHOW RESPECT:

Show you are actively listening -
the workforce will know if you are not.

CHALLENGE APPROPRIATELY:

It is important that you are listened to;
where individuals do not listen then challenge this respectfully.

CHECK

TEST UNDERSTANDING:

The ALIGN JV team should test for knowledge of the Point of Work briefings in the field and that a brief has been carried out. On all site visits it is key to test the site teams understanding of the Point of Work briefing.

CHECK DELIVERY:

The ALIGN JV leadership teams supporting the Safety will be a Success Plan should randomly attend Point of Work briefings and support the ongoing coaching of POWB's.

If activities change during the day,
ensure a POWB rebrief takes place.
