

ALIGN JV SAFELY STAND TOGETHER 2024

SAFETY WILL BE A SUCCESS

What is ALIGN JV Safely Stand Together?

Safely Stand Together 2024 was a project wide event that took place between the 13th to the 24th May 2024.

Each day consisted of 3 x 2.5 hour sessions, one in the morning, the afternoon & the evening and took place in the canteen forum room and the hazard and rehearsal academy.

The agenda for the event included:

Canteen Forum Room

Introduction - The Align Safety will be a Success day

The "Inside Track" DVD Video Newsletter

The "Shadow we Cast" Video

Completion of Personal Plan Pledges

The Hazard and Rehearsal Academy

Introduction - The Hazard and Rehearsal Academy and the safety week

The SLAM and why we need to do it

Hands off, Stepaway, Safespace

Silent Voices

SAFETY WILL BE A SUCCESS

3 KEY ASPECTS TO SAFELY STAND TOGETHER 2024

SLAM

The SLAM technique gives you full authority to stop any work if you feel unsafe.

Silent Voices

The results of using this Just Culture Toolkit / guidance system must be captured and used to assist management in decisions to implement changes or alternatives to reduce or eliminate the chance of the incident / event re-occurring, such as:

Sign the Pledge

As part of the Safely Stand Together 2024 safety week - we invited you to offer ideas on how we can finish safely and finish well and then commit to this by signing the safety pledge.

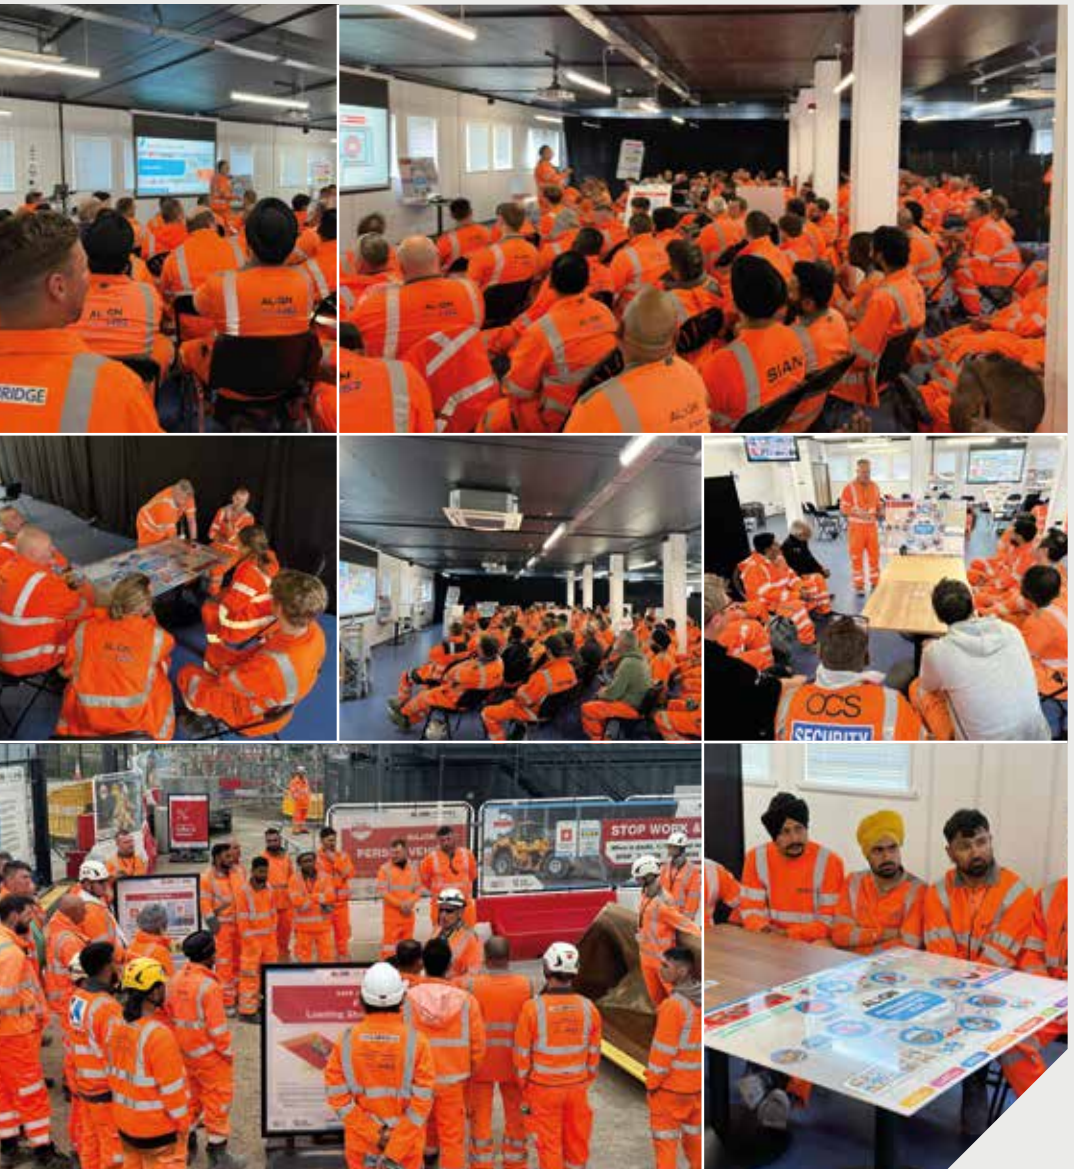

Week 01: 13th May to 17th May 2024

**Monday
13th May
2024**

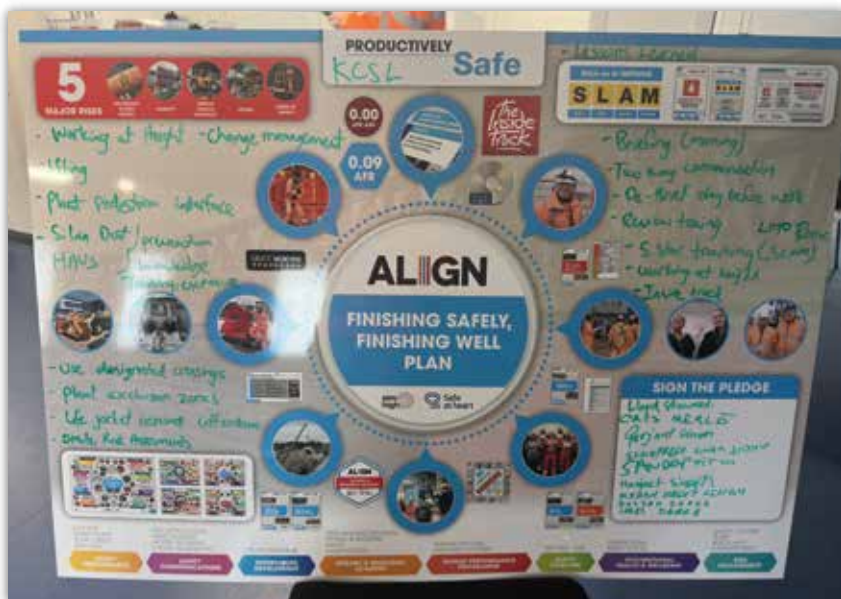

SAFETY WILL BE A SUCCESS

SAFETY WILL BE A SUCCESS

Plan 01

Transcribed Notes:

- KCSL
- Working at height
- Change management
- Lifting
- Plant pedestrian interface
- Silica dust, prevention, knowledge training, exposure.
- HAVS
- Use designated crossings
- Plant exclusion zones
- Life jacket
- Onsite risk assessment
- Lessons learned
- Briefing (morning)
- Two way communication
- De-brief day before work
- Review training
- 5 star training (SLAM) Lloyd to book
- Working at height
- Inside track

Plan 02

Transcribed Notes:

- Person vehicle interface big issue currently
- Unified risks for all contractors managed by ALIGN
- Controlled information passed to all
- Lifting - resource issues, more slingers
- Mental health 6th risk
- To be able to communicate freely and easier
- Culture to change
- All members to understand signs of change
- Mainly to be listened to is important
- SLAM - confidence to implement SLAM
- To SLAM in an appropriate manner
- Finishing Safely, Finishing Well same standard as the beginning, middle and now end
- Ongoing housekeeping at ends of CVV
- Good quality at site location
- Healthier alternatives

SAFETY WILL BE A SUCCESS

Plan 03

Transcribed Notes:

- Re-invigorate co-ordination meetings
- Proactive logistical planning considerations De-mob
- Speed limits and dust management
- Make sure traffic rates are recorded
- QR codes at KOAC and stickers
- More intermediate welfare on CUU and SP
- Agreement that SLAM is a positive tool, not something that should be abused / misused
- AIM HIGH activated
- Rollout of '5 Star' briefings
- Reinforce the confidence to step up
- Briefing on the routine and promote a sense of achievement

Plan 04

Transcribed Notes:

- TGT
- Person vehicle interface and lifting
Planning - increase people and plant
- Training
- PPE
- Laundry - gloves, wash cycles
- PPE - longevity
- Good training / education
- Pressure to SLAM
- Some can SLAM
- Briefing different languages (understood)

Plan 05

Transcribed Notes:

- CCS / OCS / D Sullivan
- Scaffold striking - dust - drilling operations
- Housekeeping
- Security points (hot weather dusty)
- Roundabout - entrance near misses
- Reduced area roadworks
- STP exclusion area / double check / weekends changes etc
- Demolition
- One way system changes - better comms
- Team can SLAM - comfortable
- Change communication (logistics)
- Turning around tippers
- No banking

Plan 06

Transcribed Notes:

- Kilnbridge
- Positives
- SLAM - everyone has an understanding
- 7 point PPE
WAH, chin strap, tools to be tethered
- Lifting procedures
- Whistles, lower, power
- Facilities
- Nurses
- Security - in/out checks
- Transport - to & from sites
- Stop to tidy work space (Kilnbridge)
- Improvements
- Water stations
- Suncream / glass wipes
- For hot weather / shade stations
- Levelling of car park
- Bon appetit prices
- Always tidy before end of shift
- Take the time - never rush

Plan 07

Transcribed Notes:

- Tarmac
- Washout facility at place of dropping load
- Being rushed - not washing
- Lack of attention by traffic marshalls
- Commit to better communication between drivers and marshall
- Proper equipment for cleaning vehicles - broom
- Concrete washout access equipment
- Debris is falling off vehicles on M25
- At least 1 SLAM per week
- Commit to a video about not cleaning trucks / wash out
- Traffic marshall / lorry driver hazard school session - what can the other see
- Safety coaches - sign up
- All Tarmac to do 5 stars
- Labour for Socotec
- No PPE provided
- PPE for Tarmac drivers

Plan 08

Transcribed Notes:

- Tarmac
- Positives
- Traffic management
- On site trained
- Voices are heard
- Community - people are nice
- Facilities
- Training academy
- Cleanliness
- Plant / people interface
- Housekeeping
- Don't be complacent
- Equipment checks
- Improvements
- Consideration of weather - too hot / too cold
- Risk / weather forecasts
- Brush down facilities
- Up to date logistics
- Sub contractor PPE
- Wheel wash at Shafts
- Dust suppression
- Gritting - road sweeper cleaning
- Signal - walkway / traffic
- Communication around site and decommissioning

SAFETY WILL BE A SUCCESS

Plan 09

Transcribed Notes:

- Kilnbridge
- Worked well and planned well
- Process is firm and approached well
- Unified risk for all contractors
- Systematic
- Better education WAH
- Silent Voices - for all team members to know basic skills to approach each other
- Not seen as a weakness
- More involvement in discussion on mental health
- Finishing safely, finishing well
- Manage complacency
- Resource management
- Continue like at the start
- More info on briefing
- Well being - promoted really well
- DVD - content is better relatable (not using actors)
- SLAM
- Confidence to approach when something doesn't look right
- Step by step SLAM
- SLAM through APP

Plan 10**Transcribed Notes:**

- Socotec
- Housekeeping could be better / brooms
- Slips, trips and falls
- Improved - could be better
- People / plant
- SLAM - not sure, not feel they can
- Everyone can speak up on mental health

Plan 11

Transcribed Notes:

- ALIGN internal works deck
- Routine maintenance hatches
- Engaging briefings
- Access / egress system
- More toilets on deck
- Address dust issue inside deck
- Water management inside deck
- Black Hat improvement on briefings
- More sunscreen / water stations

Plan 12

Transcribed Notes:

- Collins, Hawks, WTP, Volker Laser
- Hearing protection - not to right standard information WTP
Collins / hawks crane
- Chemicals - storage, vehicle collision WTP
- Walkways / vehicle interface WTP
- Reversing camera not working on van - ALIGN need transport
- Dust from vehicle movements
sprinklers speed CVV deck and STP area
- People plant internal warning devices
- Fruit on a Friday?
- Coffee is good
- Welfare north embankment
not enough space
- Break time, not enough time to eat
due to wait to have a seat
- Sleeping in drying rooms - can we have
somewhere else for a sleep
- Prayer room CVV north embankment
- New tasks - assess
- Heavy works finishing complacency
- Weather hot
Allowing breaks
Shelter / shade
Working hours
Info
Best practice
Sun cream
- Posters for AIM HIGH QR code
- 5 stars briefings
- Tunnel office electronic
notice boards not working

Plan 13

Transcribed Notes:

- Managed well
- Process managed well
- Robust system for change
- Silent voices - each team should have him to allow better communication better approach
- Picture showing morning briefing
- SLAM - step by step process on how to effectively implement SLAM
- Slow feedback on SLAM
- Can't share with wider teams

Plan 14**Transcribed Notes:**

- JOD / Collins
- Security
- High standard ALIGN
- Access to JOD / Collins area
- Communication with other trades

Plan 15

Transcribed Notes:

- Finishes internal works
- Risk assessment noise (mandatory hearing protection)
- Comprehensive daily briefings
- Good communication
- Transport from welfare to site (time lost)
- Relocate briefing location (closer to works face - P29)
- Temperature inside deck
- Radio signal (from station to P29)
- Commit to share information in all available languages
- Attend 5 stars briefing

SAFETY WILL BE A SUCCESS

Plan 16

Transcribed Notes:

- LWF - noise barriers
- 6 major risk - temperature
- Relevant platforms
- Sharing workloads
- Lack of facilities
- PVI - works well, better education
- Maintained working areas
- Ear defenders - not helping when lifting
- Appropriate PPE for specific tasks
- Mist cannon for dust suppression
- Shelter under sun on deck
- Easy access to water on deck
- More first aiders - especially remote areas
- Silent voices - more engagement from current
- No visibility - sign to be bigger
- Welfare at north embankment not suitable for resource
- Hazard Academy - good engagement in courses / induction
- SLAM - not used effectively
- Card helps implementing
- Well being - great team on site
- Communication on what substances are used near by
- Hazardous chemicals inhaled
- Waterproofing / dust

SAFETY WILL BE A SUCCESS

Plan 17

Notes:

Plan 18

Transcribed Notes:

- STP & surface tunnel
Littlewood CCC
- Planning - very reactive
- Just do it without briefing
- Dust suppression - do it first thing?
not 15:00
- Prior to work stopping
- Enough bowsters?
- As deck gets longer, there is more to do
- Deck - we asked for welfare and we got it
- Progress gets further from welfare
forecast what else
- Make clear what next steps are - who to
talk to about job security or next steps
- Communication!
Logistics - tunnel
- Manrider missing
- Collection times not met
Shifts don't match timetable
- Hot weather - check on suncream
dispensers
- Neck protectors for hard hats
- 5 star workshop
- People have tickets, how do we
know competence before starting them
e.g. harness training IPAF

**Tuesday
14th May
2024**

**SAFETY WILL BE A SUCCESS**

SAFETY WILL BE A SUCCESS

Plan 19

Transcribed Notes:

- VSL / OCS / ALIGN D
- Positives
- Dust suppression
- Training programmes
- Briefings
- Good co-ordination
- Planning between the gang before doing the task
- Hands off / poles (lifting)
- Be vigilant every day!!!
- Improvements
- Good housekeeping
- Maintain site in good shape
- VSL is not allowed to use laundry???

SAFETY WILL BE A SUCCESS

Plan 20

Transcribed Notes:

- J Coffey / CLS
- Positives
- Good level of safety
- "Get out of here in one piece"
- Improvements
- Fatigue / long hours
- PPE (adjust to conditions)
- Ear defenders / zones
- Dust suppression - more frequently

Plan 21

Transcribed Notes:

- Safer here
- Better planning at ALIGN
- Communication - other trades
- Possible - join briefing explain roles
- Well managed traffic route
Have road best
- Track wash
- Better access for cleaning plant (Scaffold?)
- When eating - break / munching activity
at same time at briefings - 10:30 to 11:15
2.30 to 3.00
- Cleaning cabs - better cleaner
- AIM HIGH app - working
- Food exposed - open - no good - unhygienic
- Walkway - washing MSV
- MSV's on slopes - near walkway
next to entrance
- Ignoring traffic lights
- "Communication is key"

Plan 22

Transcribed Notes:

- TGT, CCC Logistics
- PVI - segregation not adequate
- Resource is stretched, more strain on
- Stick to walkways but not fit for purpose (blocked, traffic marshal not present)
- Safety "no budget" available
- 24/7 operation but is support 24/7
- No health centre
- PPE access
- Safety culture 'not good'
- Middle management - need communication between senior management and workforce
- Fear of being held to account if you SLAM
- Employee welfare - same standard across all areas please
- Reporting - need action and feedback quality of feedback
- PPE and workwear limited
- Process to PPE equipment can we order by APP

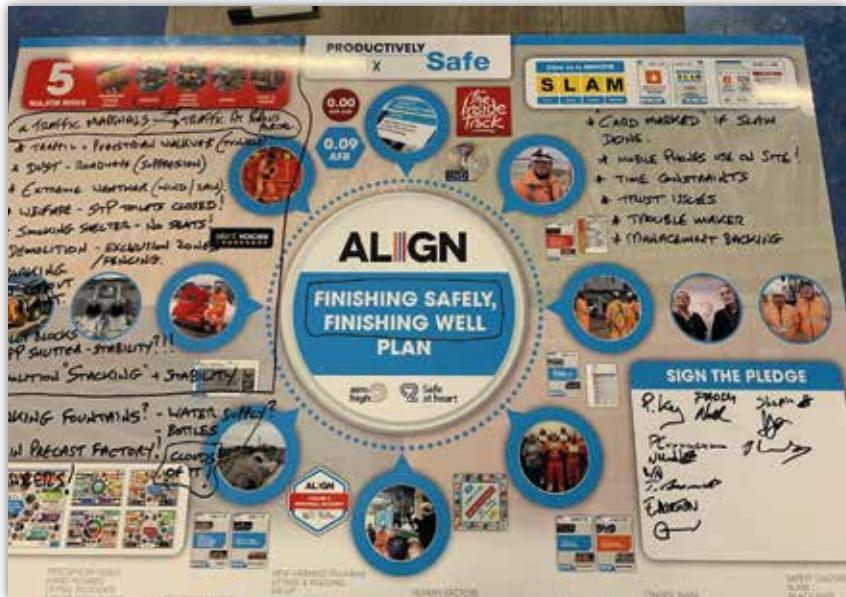

Plan 23

Transcribed Notes:

- STEP / TBM workshop / Pre Cast
- Dewatering lines: permit of works to disconnect any lines
- Lifting: good exclusion zone
- Need to control the load hands off (when practical)
- Training for hands on load control
- Experience - training
- Involve supervisors on lift plan
- Dust: dust controls on road, inside factory / buildings
- Fatigue: 12 hour shift, sometimes 13 hour
- Weekly travel as part of last shift
- Damage lifting equipment
- Stop lift and review lift plan
- Aim High

Plan 24

Transcribed Notes:

- Traffic marshalls - traffic at porous portal
- Traffic and pedestrian walkways (tunnels)
- Dust - roadways (suppression)
- Extreme weather (wind / rain)
- Welfare - STP toilets closed!
- Smoking shelter - no seats!
- Demolition - exclusion zones / fencing
- Parking
- Kelly blocks on PP shutter - stability?!!
- Demolition "stacking" and stability
- Drinking fountains?
Water supply?
Bottles
- Dust in precast factory!
Clouds of it!
- "Card marked" if SLAM done
- Mobile phone use on site!
- Time constraints
- Trust issues
- Trouble maker
- Management backing

Plan 25

Transcribed Notes:

- Security
- Continue regular workshops
- Ask questions
- Changing environments
- Work with safe limits
Weather / human factor
- Working at height
Knowledge / awareness
- Look out for deviations
from the plan
- Safe positions
- Manager support
- Site support
- Two-way comms
- Confidence to challenge
other contractors
- Appropriate channels of comms
- Aim High

Plan 26

Transcribed Notes:

- Pre cast factory
- Safe operation of machinery
 - Banksman
 - Good briefing
 - Exclusion zone
- Complacency
 - Regular briefs
 - Review of RAMS
 - SLAM
- Interface
 - Good briefs and communication
 - Planning
- Time pressure
 - Explain clearly
 - Speak to supervisor
 - Education
- Morale of staff
 - Leading to distraction
 - Engagement from others
 - All Levels
 - More updates from leaders
 - e.g. key dates
- PPI
 - Lack of understanding
 - and more briefings
 - Improve communication and education
 - Brief prior to task

Plan 27

Transcribed Notes:

- Plant team
- Narm temps
- Confined spaces
- Entrapment / crushing
- Engaging all workers
- Better communications
- Mental health
- Better briefings
- More Aim High's
- More praise for team
- Next job
- Role play!!

Plan 28

Transcribed Notes:

- Ladder eliminated
- Sticking plan
- PPE too much
- Sharing site learning better
- Mental health awareness
- Point of work briefing
- Training
- Good communications between team
- Friday packs contractor share their information
- Task specific
- Ear plug inflammation
- Happy to SLAM

Plan 29

Transcribed Notes:

- Plant team (launch girder)
- Temp electrical works (wingate)
- Positives
- Working with good people
- No time pressure
- Good welfare facilities
- Collaboration
- Good gain of knowledge
- Levelling up through training courses
- "Continue what we are doing"
- Improvements
- Maintenance of haul roads (too many punctures)
- Improve / tool box talks increase
- More information on incidents / accidents

SAFETY WILL BE A SUCCESS

Plan 30

Transcribed Notes:

- CCC / TM / Plant Team
- Fatigue - shift patterns (nights to days)
- Under pressure
- Bonus schemes - rushing to complete
- Alcohol consumption (snooze box)
- Ego's
- Mental Health
- Respect between colleagues
- Agency workers
- Leaders not just managers
- Mutual respect
- Doing this with managers
- Regular checkins with your team
- One to ones with a mutual contact
- Mental health 1st aid sign up
- Team / mental health check in
- Darts tournament

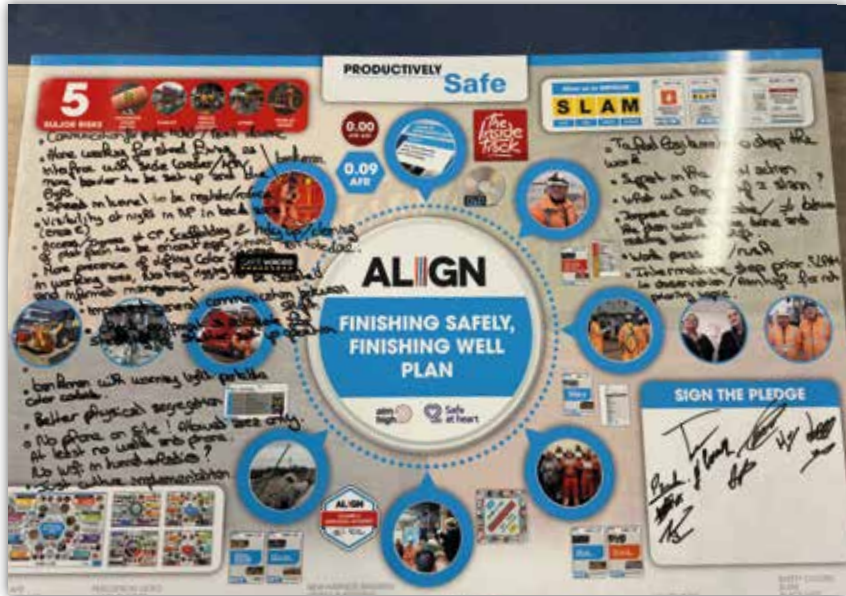

Plan 31

Transcribed Notes:

- NP and CP
- SLAM if feeling unsafe dismantling and scaffolding
- Lack of equipment and consumables
- Think ahead - prepare for things that can go wrong
- NP - insufficient welfare
- Dust monitoring must improve
- SP - insufficient welfare facilities
- Bonus must depend on safety too
- SLAM if correct PPE or tools are not available at NP

Plan 32

Transcribed Notes:

- Communication for people ticket / permit allowance
- Alone working for steel fixing as interface with side corner / MSV more barrier to be setup and blue light
- Speed in tunnel to be regulated / reduce
- Visibility at night in NP in deck area (area 2)
- Access / ingress at CP, scaffolding and tidy up / cleaning of platform to be encouraged, general TBT to be done
- More presence of different colour in working area no tag rigging to be isolated and inform management
- Improve general communication between shift
- Check equipment is adequate for shutter setup operation
- Banksman with warning light
- Better physical segregation
- No phone on site! Allowed area only. At least no walk and phone
- No wifi in tunnel - Radio?
- Just culture implementation
- To feel entitled to stop the work
- Support in the SLAM action
- What will happen if I SLAM?
- Improve communication
- Not equal between the plan, work to be done and reality between shift
- Work pressure / rush
- Intermediate step prior SLAM Observation / Aim High for not priority topic

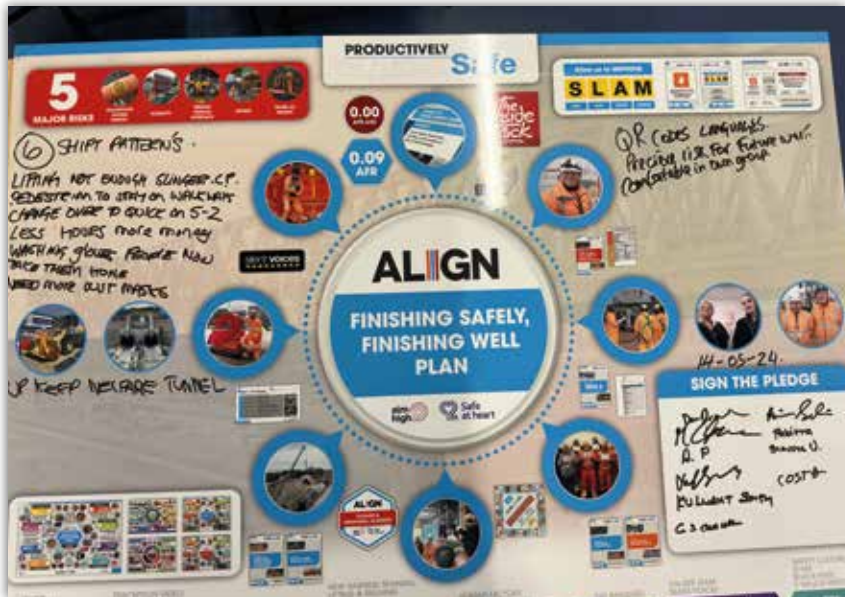

Plan 33

Transcribed Notes:

- CVV PLY, NP, CP
- Cross passage - pouring concrete from the platform - WAH!
- Housekeeping in the tunnels
- Clear walkways in cross passages needed
- Welfare, hygiene in cross passage
- Mental health stress
- Workload from management
- Monitoring dust in the tunnels and air quality
- SLAM if feeling unsafe!
- Help each other
- Cross passage - proper ear defenders

Plan 34

Transcribed Notes:

- 6 Major Risk - shift patterns
- Lifting not enough slinger CP
- Pedestrian to stay on walkways
- Changeover to quick on 5-2
- Less hours more money
- Washing gloves, people now take them home
- Need more dust masks
- Up keep welfare tunnel
- QR codes languages
- Perceive risk for future work
- Comfortable in own group

Plan 35

Transcribed Notes:

- North portal TBM surface south portal
- WAH - reluctance to put up scaffold due to programme
- Slips - polymer in the invert.
Find a way to clean up and protect those in the cleaning
- Materials left in invert
- Risk of collision with MSV
- No lights etc.
- Space to manoeuvre MSV
- High beam lights adjust
- Welfare at north portal
- On the slab - water quality
- Distance to main welfare eats into break
- Number the cross passages on both sides - emergency
- Showers - water pressure
- Lack of equipment for rigging and fleeting loads.
- Risk of making do doesn't match training
- No trust in management to support the process
- Feedback
- Targets, push production

Plan 36

Transcribed Notes:

- NP team and CP team
- Workplace cleanliness
- Slips / trips / falls (better preparation)
- Inadequate lighting
- Training on use of different equipment
- CP's more spare versiflow filters
- More frequent air move ups ventilation
- More charging points Battery tools
- Job info and handover needs improvement
- SLAM - confident to use
- More POWRA's
- OHS nurse daytime only

**Wednesday
15th May
2024**

SAFETY WILL BE A SUCCESS

SAFETY WILL BE A SUCCESS

**SAFETY WILL BE A SUCCESS**

Plan 37

Transcribed Notes:

- Positives
- Food
- Daily briefing format
- Supervisors supportive
- Good work culture
- PLEDGE: Don't become complacent
- Improvements
- Language barriers
- Take 5 awareness
- Lack of speed monitoring
- Allow time to clean inside machinery and supplies (manage dust)
- Chemicals

Plan 38

Transcribed Notes:

- Earthworks
- Good relationships
- Trust among the team
- Not to swap teams frequently
- Better communication for the activity of the day

Plan 39

Plan 40

Plan 41

Transcribed Notes:

- Safety zones - pickups?
- People drive into areas without letting you know
- Pugmill - better co-ordinations (cleaning operations)
- Too busy
- Work vans to get to area
Can this be re-introduced?
- We double handle material more than we need to sometimes? Why?
- Too many vehicles in areas they should not be in
- Maintain transport options for team till the end of project - access

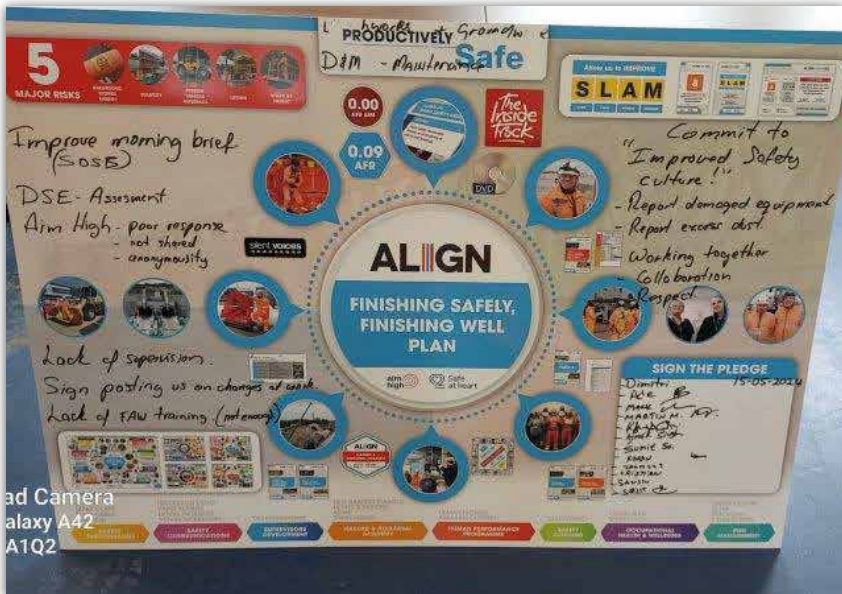

Plan 42

Transcribed Notes:

- Earthworks
- Good Safety Record
- Good communication
- Good relationships
- Good briefings
- Good condition of roads (stability)
- Good management of transports (people / vehicle interface)
- "We continue to care about each other as a team"
- Good feedback to keep
- Maintenance of areas
- Improve:
 - Nurses to come to landscape pod
 - Mates in mind

Plan 43

Transcribed Notes:

- Earthworks and Groundworks D&M maintenance
- Improve morning brief (SOSB)
- Aim High
Poor response
Not shared
Anonymously
- Lack of supervisors
- Sign posting us on changes at work
- Lack of FAW training (not enough)
- Commit to "Improved safety culture!"
- Report damaged equipment
- Report excess dust
- Working together
- Collaboration
- Respect

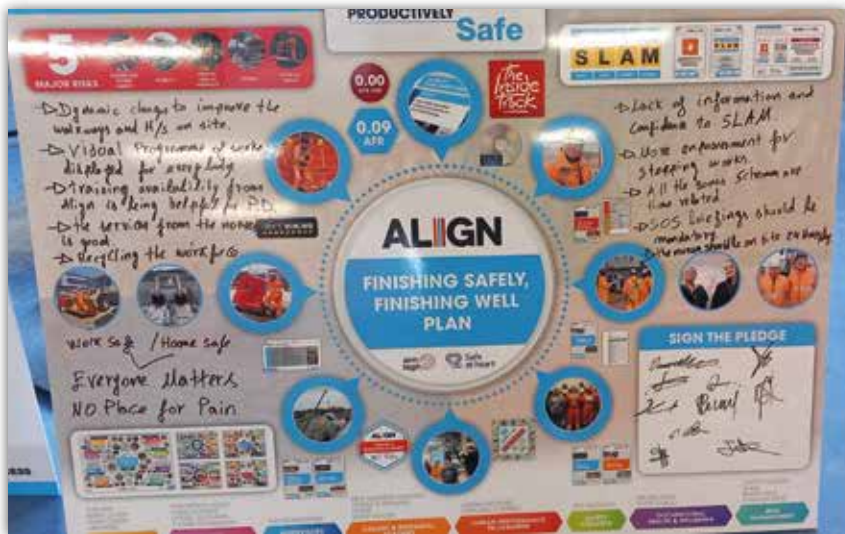

Plan 44

Transcribed Notes:

- Porous portac, electrician (surface)
Logistics, security, telecommunications
- Aim High app
- Good communication
- Good support for mental health
- Teamwork - supporting team
- Don't rush the work
- Work safely
- Going home safely
- Use SLAM
- Looking after our team
- More traffic marshalls for porous portal
- Dust suppression in PP
- Long hours - 12 hour shifts and commuting
- Consider less hours
- Food is expensive and poor quality
- More buggies / long drive in tunnels
- Mates in mind for PP
- Rats in TPF
- People don't respect rules in the gate
Include rules in induction

Plan 45

Transcribed Notes:

- Dynamic changes to improve the walkways and H/S on site
- Visual programme of works displayed for everybody
- Training availability from ALIGN is being helpful for PD
- The services from the nurses is good
- Recycling the workforce
- Work safe / home safe
- Everyone matters
- No place for pain
- Lack of information and confidence to SLAM
- More empowerment for stopping work
- All the bonus schemes are time related
- SOS briefings should be mandatory
- The nurses should be on site 24 hours / day

Plan 46

Transcribed Notes:

- Porous portal - earthworks
- Platform installation done incorrectly
- People from other dept coming on site without notifying supervisor
- Train office people on perception of risks as lot of them are new to construction. They should be accompanied and don't pop up on site
- Too many visitors, do they need to enter working area?
- Planning of weeks briefing
- Good segregation / good barriers
- Interface management to be shared with all teams and all levels for knowledge
- PPE distribution and availability in working areas not to walk to PPE store
- Drinking water fountain and cups issue metal bottle
- Check restroom in tunnel offices
- Confident to SLAM if unsafe
- SLAM process is clear & I'll explain to new
- Keep a high level of respect for everyone at all levels
- I will keep always an eye out so my co-workers go home safely
- Watch out for mental wellbeing of everyone
- Engage and be part of ALIGN safety culture

Plan 47

Transcribed Notes:

- Hazardous stored energy
lack of understanding
- Change management
reassess the risks
- Segregation feel secure
- Edge protection
- Good signage
- Speed Limits - 20
- More mental health first aiders
- First aid should be mandatory
- More money,.....less hours
- Awareness, knowledge training
in other areas to feel confident
to challenge!
- SLAM - how do we do it?
- SLAM is positive but must be recorded
- Shift hours (12 hours)
- Fatigue!
- SLAM in different languages
- Fair, consistent
- Feedback needed from observations
- Encouragement, empowerment to SLAM
- Good safety culture

Plan 48

Transcribed Notes:

- Surface MSV and workshop Earthworks, Porous Portal
- Must do point of work risk assessment Engineers make sure it's done
- Risk - handover between 12 hour shifts
- Team boards not sufficient - leads to longer shifts + 1 hour
- Insufficient tools / lost stolen not signed out leading to shortcuts
- Length of time for orders to be delivered 24 hours possible
- Failure to report damaged equipment Regular visual inspection
- Staffing - right person, right job
- People leaving off work Bringing in new people
- Maintenance of training
- Commitment by manager to workforce to be able to attend training
- Highlight risk of power washers
- Access to tool box talks on Teams
- Multi language
- Need to focus on ancillary tasks such as workshops so they can better support main production
- Additional forklifts to help move materials / waste etc
- No feedback on AIM HIGH
- 5 stars workshop a must
- People plant interface tunnel access and in tunnel speed / earthworks
- Change in traffic routes
- Need good notice of changes

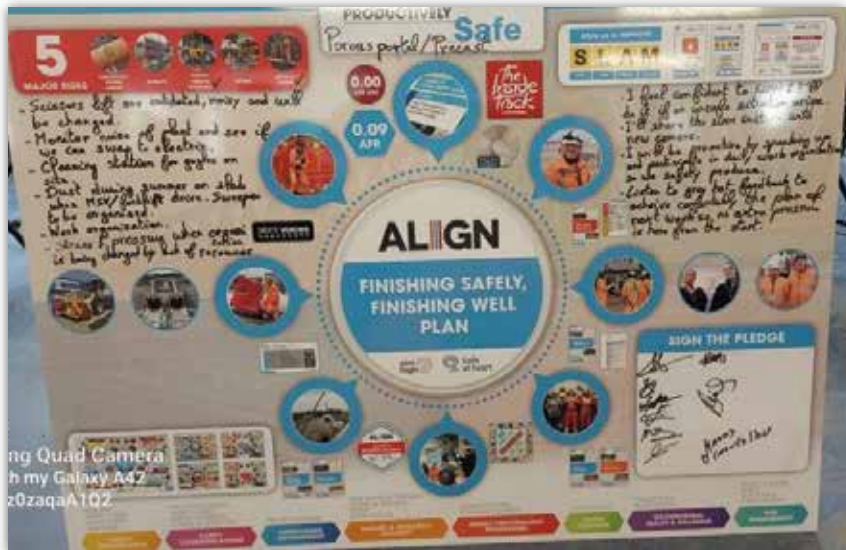

Plan 49

Transcribed Notes:

- TPF / Plant / HOAC
- High standards in ALIGN
- Good non-stop communication and co-ordination
- Other risks
 - Moving parts
 - COSHH
 - Use of mobiles
- Good practice - use of horns
- Be fair and firm
- Communicate and challenge
- SLAM
- Keep the good spirit alive
- Continuous learning on all aspects
- Traffic management
- Brief out different languages
- SLAM is used sometimes out of context
- Explain / train how to use it
- Improve briefings for the supply chain to ALIGN standards
- Continuity of the teams
- Relationships are strong already
- Apprentices are left alone

Plan 50

Transcribed Notes:

- Porous Portal / Precast
- Scissors lift are outdated, noisy and will be changed
- Monitor noise of plant and see if we can swap to electric
- Cleaning station for goggles on site
- Dust during summer on slab when MSV / forklift drive, Sweeper to be organised
- Work organisation
- Stress and pressure when organisation is being changed by lack of resources
- I feel confident to SLAM and I'll do it if an unsafe situation arises
- I'll share the SLAM with new comers
- I will be proactive by speaking up and participate in daily work organisation so we can safely produce
- Listen to grey hat feedback to achieve comfortably the plan of next week, no extra pressure is here from the start

Plan 51

Transcribed Notes:

- 6 Major Risks - mobile phone use on site
- W@H - "crash mats"? MSV's
- Training / changes in team
- PPE stores - not easy to get stuff
Not enough clothing issued.
- Tunnel entry requirements - some people not got all tickets
- MSV's - access onto HIAB's - how?
- Inexperienced staff v competent staff
- Dust in tunnels (when dries out)
PPE / glasses cleaning stations
- Hand sanitiser
- Welfare - heavy duty hand cleaner - none there!
- Tideway - lifting team pre-assessment
- No 'chargehands'
- No safety assessment - prestart
- SLAM:
- Seen as trouble makers
- Unproductive
- Not reporting quickly
- Double standards (hazard reported but continued)
- N/S or weekend jobs

Plan 52

Transcribed Notes:

- COSHH cross contamination
- Speeding – buggies/vans and ground operations
- Extra trained staff – slingers
- Pressure from management forcing shortcuts
- Stored energy – untrained people inflating tyres
- Not appreciating the “little man”
- TGT comms / false promises
- Lack of PPE / issues of store
- PPE van?
- Comms for programme and job security
- Welfare for shift worker
- Food for shift / quality
- Canteen not for shift workers
- Backlash / repercussions
- Feeling like management don't care
- Lack of training

Plan 53

Transcribed Notes:

- Tunnels
- 6 Major Risks
- Poor communications / organisation (between 'office' and crews)
- Shortcuts – taking easy way out
- Personnel transport in tunnel – lack of / no manrider some shifts
- Eyewash lack of
- Glasses cleaner
- Fire marshals
- First aiders
- MHFA
- Advertise who is who and where.
- Hard to do as black hats conflict

**Thursday
16th May
2024**

SAFETY WILL BE A SUCCESS

SAFETY WILL BE A SUCCESS

Plan 54**Transcribed Notes:**

- VSL
 - Good briefings
 - 2 way interaction
 - Hi - tech inductions
 - "Recognition for operative for good practice"
 - VSL have an APP - phone
- Confident to SLAM

Plan 55

Transcribed Notes:

- Mental Health - extra major risk
- Good breaks - OCS
- Good communication
- Security - well protected shelter, sun and rain
- Portable toilets required on piers 15/16 - 19 now gone
- Capacity - people not enough
- Training - IPAF not all, sometimes no groundman for cherry picker (MEWP)
- Internal politics - simple things take a long time
- Improve exclusion - more barriers

Plan 56

Transcribed Notes:

- KVJV - Cross Passages
- Dust issues in tunnel
Uncomfortable flow of air in tunnel
Cold and windy
- Traffic in tunnel (poorly managed)
Smaller vehicles are hazardous
- Maintenance
- Mental stress (waiting for transport out of the tunnel)
- Planning (logistics)
- No proper emergency plan in event of flooding at shaft areas
- Poor communication between teams
- Commit to improving
- Daily brief (2 way comms)
- Increase SLAM activity
- Take ownership / responsibility
- Respect each other
- Positive mental health

Plan 57

Transcribed Notes:

- KJVJ / J Coffey / OCS
- More maintenance plant and equipment
- Takes time to get equipment fixed
- Need more banksman to help control vehicle interface at viaduct (narrow space)
- People passing by operating vehicles
- Tight space where we install the shutters (bigger crane with longer reach)
- Tunnel cross passage poor welfare hygiene (toilets and canteen)
- "Time constraints"
- Working late - to meet the programme at the last hour to rush & finish concrete (rushing to finish)
- OCS (holding area needs welfare cabin at the junction)
- SLAM
- "Commitment to look out for each other"
- Collective responsibility
- Daily briefing - refresh emphasise importance of exclusion zones
- Spend more time on safety brief (two way comms)

Plan 58

Transcribed Notes:

- KVSU (LP)
- Good communication respect in all levels
- Good organisation in works and the team
- PPE (full - good supply) good quality
- Good facilities in working environment
- Rescue plan
- Medical care
- Access to information
- Briefing
- Lifting plan / procedures
- Exclusion zones
- Good control of 5 Major Risks
- SLAM has been challenged by supervisors
- Info on the available training programme
- Appraisal - skills accreditation for workforce in agencies
- Keep the know how obtained in this project
- Language improvement training

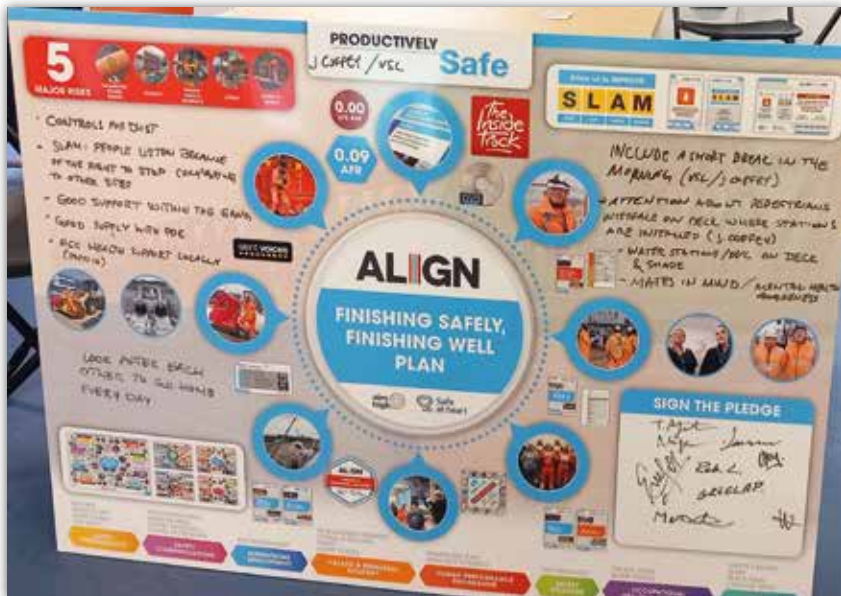

Plan 59

Transcribed Notes:

- JCI / VSL / KCSL
- Implementation of HIAB on tunnel MSV with a good initiative reduced manual handling
- VSL good improvement on COSHH storage and env. control spill kits
- 6th risk - rush, taking shortcuts, pressure from management
- Bon appetit mean, quality and prices to get better
- No water station on tunnel canteen
- Some MHFA are not 'suitable' to provide support to the team
- Number of MHFA is not enough
- MHFA training to be opened for all
- Implement familiarisation to first aid on induction
- More attendance to 5 stars briefing
- Advertise more the charity side of AIM HIGH, helping people is more engaging
- SLAM should not be just an APP A 5 minute chat would be more efficient
- Add different beacon for first aider car to identify emergency

Plan 60

Transcribed Notes:

- J Coffey / VSL
- Controls for dust
- SLAM: people listen because of the right to stop comparing to other sites
- Good support within the gang
- Good supply with PPE
- Occ. Health support locally (physio)
- Look after each other to go home every day
- Include a short break in the morning (VSL / J Coffey)
- Attention about pedestrians interface on deck where stations are installed (J Coffey)
- Water stations on deck and shade
- Mates in mind / mental health awareness

Plan 61

Transcribed Notes:

- PCY
- Positive attitude from security in main gate
- Safe working environment
- Warning in place (lifting operations)
- Stay safe in everything we do
- Respect of exclusion zones
- Maintenance of toilets too often they are not working
- Proper spending of money (FOSHH crossing, APPS)

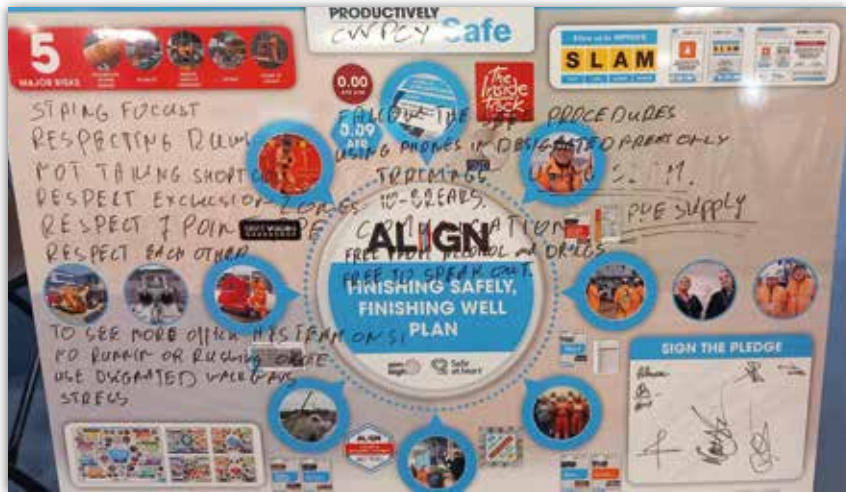

Plan 62

Transcribed Notes:

- CVV PCY
- Communication!
- Breaking the ice / mental health and well being
- Respect 7 point PPE
- Following safe procedures
- Training
- Using phones on site
- SLAM
- Using plant correct and safe way
- Don't walk by
- Welfare facilities, never be scared

Plan 63

Transcribed Notes:

- CVV PCY
- Staying focused
- Respecting rules
- Not taking short cuts
- Respect exclusion zones
- Respect 7 point PPE
- Respect each other
- To see more often H & S team on site
- No running or rushing on site
- Use designated walkways
- Stress
- Follow the safe procedures
- Using phones in designated areas only
- Training
- 10 - Breaks
- Communication
- Free from alcohol and drugs
- Free to speak out
- Using SLAM
- PPE supply

Plan 64

Transcribed Notes:

- CVV - Precast
- Focus on your tasks
- Better management in housekeeping is needed
- Speed control must improve
- Supervision must improve
- Better planning needed
- Dust suppression must improve
- Inexperienced lifting
- Include operatives in planning
- Follow the plan and procedure
- Fatigue and overtime need more attention
- TBT on rest and sleep
- More competent leaders
- Safety first, SLAM if you feel something is unsafe
- Respect each other
- Collaboration
- Fairness
- Diversity
- Patience

Plan 65

Transcribed Notes:

- CVV PCY
- Planning and supervision to improve
- Exclusion zones must be setup before the work
- Implement the 5 core values
- Support each other with mental health problems
- Report any issues
- To improve dust monitoring
- More frequent TBT on health and safety issues
- Improve our briefings and 1 on 1 conversations
- Safety first, SLAM
- Respect the rules
- Don't use dangerous shortcuts
- Ask questions
- Do not rush the job

Plan 66

Transcribed Notes:

- C1 North
- Pre construction info
How good is it - treat it as a blank canvass
- How to maintain / transfer culture - ALIGN
- Expanded induction C1 North
What will that look like
- Comms around continuation of existing project - not isolated
- EKFB interface = KEY
- Person vehicle interface
public paths and crossings etc
- SLAM - resource must be in place

Plan 67

Transcribed Notes:

- Human error (rushing)
- Listening - communication
- Wrong place / wrong time
- Concentration
- Rules not followed
- Planning - constant changes
- Message hard to communicate
- Lifting team trying to keep up
- Pressure from other trades
- Training - upskilling young people for different trades
- Legacy for HS2 and construction
- Not comfortable to SLAM
- Production first
- Good things
- Welfare facilities
- Canteen
- Gym
- Laundry
- Good training
- STAY ALIVE

Plan 68

Transcribed Notes:

- North Portal - team Viaduct P1 - P57
- Welfare facilities (north portal)
- North portal shower very bad condition
Mould, water pressure
Water is dirty coming into north portal
- We don't want to fill in Aim High cards because nothing happens
- Welfare facilities at Pier 39 (welfare) very dirty and unhygienic
- Water cooler (machine filters are dirty)
- Priority is given to everything else but no one cares about our welfare (showers)
- No hand cream to protect our hands
- No support from management to plan and arrange welfare.
- North portal food vans not on time (we are losing break time)
10 weeks ongoing.
- First aid boxes not replenished
- No eye wash stations!
- Fatigue study was not given to us - was mostly office staff!!
- We need 10 hour shifts.
- We pledge:
 - Respect
 - Collaboration everywhere
 - Better communication
 - Teamwork
 - Take our time (less pressure) (POWRA)
 - Stop and think
 - Better planning with team

Plan 69

Transcribed Notes:

- TGT / ALIGN
- Peer pressure
- Reaction is slow
e.g. damaged lifting equipment
- Complacency - change jobs
- Snoozebox - positive
- Nights on gantry "no banksman"
- Lack of traffic marshalls
- Group SLAM but do not record
- If major issue then we would SLAM
- Better facilities at night - food
- PPE - stockpile at north portal
- Turnaround from laundry can be slow
- Toilet MSV tent area -
not being cleaned - filthy

Plan 70

Transcribed Notes:

- CVV Precast Steel Fixers
- Safe working environment
- Confident to SLAM
- Good teamwork
- Safety walks
- Good communication when lifting is ongoing
- Main risks :
Ergonomics
Slips, trips, falls
- Keep safety communication on good level
- Exclusion zones have improved but are a challenge
- Morning warming up before work
- If the BH does this people will follow
- Physio appointment

Plan 71

Transcribed Notes:

- 6 major risks
- Welders "cut off" from site (not aware of vehicles)
- Pedestrian routes
Signage not clear
- Walkways at tunnel entrance
- Briefing and competent people / new starts
- Obstructions and lighting on invert (stillage timbers!)
- Low point flooding / debris
- Some gates wrong way around (no hand holds!)
- Task lighting for repair team (segment crew)

SAFETY WILL BE A SUCCESS

Plan 72

Transcribed Notes:

- VSL, JCY, CLS
- Briefings, Communications
- Following RAMS, Lift Plans
- Improve Communication
- Better clear brief for non english speaking
- Training
- Planning (improved)
- Wage (disparity)
- Sense of emotional
- Language barrier (translation) help to pass message
- Enforce SLAM
- Lack of experience to do the job
- More respect
- Collaboration improvement
- Improve planning (less pressure)

SAFETY WILL BE A SUCCESS

Plan 73

Transcribed Notes:

- Jacob & VSL
- Manual handling (training) pinched fingers
- Not enough cones for exclusion zones
- Briefing
- Pressure at work (mental health)
- MEWP training
- Traffic marshal training
- Speed cameras
- "We will SLAM"
- Lifting jack (not enough manpower)
- Mental health
- Pressure from rushing supervisors

**Friday
17th May
2024**

SAFETY WILL BE A SUCCESS

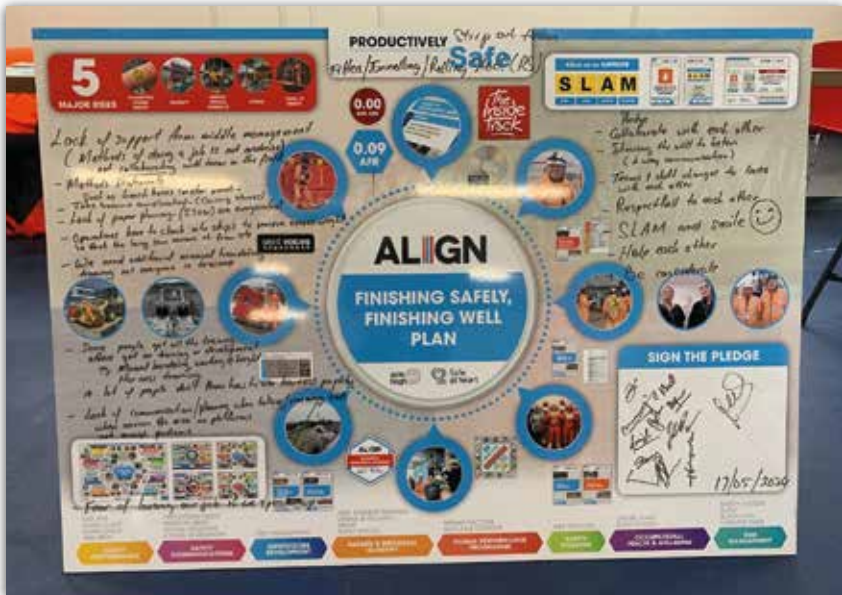

Plan 74

Transcribed Notes:

- TGT / ALIGN
- 6th risk - mental health
- Shift pattern does not work
Travel within 12 hour shift
- Above leads to fatigue
Worst pattern
- Snoozebox - positive
- PSV seats - no good
Destroy backs!!
- No aircon
- Sensors on MSV pickup
(calibration)
- Communication management
and workforce
- "Invisible layer"
- Other trades not tethering tools
- Leave rubbish on platforms
- Mental health
- Shift pattern change
8 hr - 10 hr - 12 hrs
- Hybrid shift = choice

Plan 75

Transcribed Notes:

- Strip out team / Fitters / Tunnelling / Rolling Stock (RS)
- Lack of support from middle management (methods of doing a job, not collaborating with team in the field)
- Method statements such as trench boxes
- Jobs become complicated - causing stress
- Lack of proper planning (SSOW) are exaggerated
- Operatives here to climb into skips to remove excess weight so that the lorry can remove it from site
- We need additional manual handling training Not everyone is trained
- Some people get all the training - others get no training or development e.g. manual handling, working at height, harness training A lot of people don't know how to use harness properly
- Lack of communication / planning when taking / removing loads - when accessing the MSV no platforms not enough podiums
- Fear of losing job if we speak up
- Pledge:
 - Collaborate with each other
 - Showing the will to listen (2 way communication)
 - Teams and shift changes to liaise with each other
 - Respectful to each other
 - SLAM and smile :-)
 - Help each other
 - Be considerate

Plan 76

Notes:

Plan 77

Transcribed Notes:

- Tunnels
- 6 Major Risks
- NP Welfare
- No water supply / pressure
- No toilet flush
- Showers!
- Food van only (and vending)
150 on site (approx..)
- PPE – stores at SP!
- Laundry collected (but takes ages to come back!)
- PPE from stores – feckin nightmare!
- Battery supply – difficult allocation!
- AIM HIGH prizes
- AIM HIGH / SLAM available.

Week 02: 20th May to 24th May 2024

SAFETY WILL BE A SUCCESS

SAFETY WILL BE A SUCCESS

Plan 78

Transcribed Notes:

- APP is tricky
- SLAM is ok
- Briefings are good
- TBT are good
- PPE in summer is difficult hot
- Good equipment
- Glasses in rain Can't see
- Smoking and welfare together
- More fountains

SAFETY WILL BE A SUCCESS

Plan 79

Transcribed Notes:

- Littlewoods and Fleet
- Complacency
- Fatigue
- Poor driving
- Traffic management
- WAH
- Lifting
- Hot weather
- Dust
- HAVS
- Night working
- Speed of lorries off M25
- Bespoke lifting equipment
- Drinking fountains
- Temporary shelter (temp works)
- Rest periods
- PPE specific to hot weather
- LWF book in for 5 stars (matt)
- Anti vibration tools
- Road markings need revamp
- Adequate lighting
- Speeding lorries speak to logistics team

Plan 80

Transcribed Notes:

- VGC / Danny Sullivan / ALIGN
- Person vehicle interface
- WAH
- Lifting
- Stability (weather)
- Diving operations
- Slip, trips, falls
- Manual handling
- Hot weather
- Corner off forklift in warehouse
- Loading area
- Risk: loss of key staff / operatives next 12 months
- Right competencies
- Training (manual handling)
- Maintain good communication
- Briefings (mornings)
- Debrief
- Redeployment
- Incentives to prevent key staff leaving
- Shelter, water, suncream
- Local ventilation in the deck
- MHFA - open it up more
- Be kind
- MHFA - ensure each group is represented - know your team

SAFETY WILL BE A SUCCESS

Plan 81

Plan 82

Plan 83

Transcribed Notes:

- Confined space
- Dust suppression
- Water machines
- Mobile phone zones
- PPE compliance
- Unsafe conditions
- Look up!
- Look around
- Confidence to SLAM
- Lack of knowledge and qualification
- Organisation and communication
- Fatigue

SAFETY WILL BE A SUCCESS

Plan 84

Transcribed Notes:

- Ensure construction drawings are up to date
- PPE is good with Keltbray
- Future works to include site logistics, delivery
- Clarity on lift plan for HIAB's
- Need more training
- Happy to SLAM

Plan 85

Transcribed Notes:

- Ear plugs - do we need them
- Masks
- PPE - do we require all the time
- Drinking water on site
- Traffic marshall should they be with machines all the time
- Heavier barrier / sand bags provided to stop wind blowing over
- Cable management on site
- More communication

SAFETY WILL BE A SUCCESS

Plan 86

Transcribed Notes:

- COSHH
- Dust
- Cutting corners
- Fatigue
- Communication
- Hoist for people
- Co-ordinate better in blackhat
- Report and record SLAM

Plan 87

Transcribed Notes:

- Everyone to speak english
- Lifting procedures using 360 different so more thought needed
- Disrespecting the site rules
- Good facilities
- No proper handover between site managers
- No rewards
- SLAM will work
- 5 star training

SAFETY WILL BE A SUCCESS

Plan 88

Transcribed Notes:

- Plan the process better
- RAMS – better clearer
- RAMS to be revised more often re briefings
- More training i.e. IPAF
- Better communication
- Approach individual ask them to stop
- More respect when approaching / talking to people
- More confidence to stop work
- Training on how to approach people respectfully

Plan 89

Transcribed Notes:

- 5 major risks
Happy with rules -
we have well controlled
- Clean the front / exit - wheel wash
- Need sweeper
- Dust
- Strong smell
- Scaffold platform tidiness
- Celebrate SLAM

Plan 90

Plan 91

SAFETY WILL BE A SUCCESS

Plan 92

Plan 93

Plan 94

Transcribed Notes:

- Better communication between teams
- Planning ahead
- Question over push pull sticks
- Keltbray to be included in rigging course
- Organisation of working team, not everyone in the same place
- PPE improvements, insufficient for weather
- Cheap, tears easy
- Traffic marshal compliance
- Improve plant awareness
- Sitting in machine
- Happy Chat / STOP not sure on SLAMMING

Plan 95**Transcribed Notes:**

- Moving plant and machinery
- Exclusion zones
- Working close to edge
- Must look down please
- Lifting activities
- Integrate H&S in all design
- To include access, egress, temporary works, lighting, safety systems and manual handling issues

Plan 96

Transcribed Notes:

- Traffic control
- Communication
- Stick to the plan
- Exclusion zone
- Lifting works
- Working at height competence
- Separation between briefing and smoking area
- Addition of water point
- Happy SLAMMERS!
- Slip, trip hazards (especially slab openings)

Plan 97

Transcribed Notes:

- Mobile phone zones
- Water machines
- Maintain one way system
- Convex mirrors on site
- Better food quality
- Ice cream van to visit each site
- More information on silent voices
- More mental health training
- More slots for park health
- Lack of knowledge
- Confidence to be able to stop work
- Training how to approach / challenge
