

Exhaustive list of exclusions by major risk Health & Safety

Reference : BYTP-H&S-INF-2113-vA

BUILDING FOR LIFE

Liste exhaustive des exclusions par Risque Majeur

Any event related to one of the 6 Major Risks is to be considered as a High Potential one (HiPo), if not severe due to its actual consequences, **unless exceptions.**

Here below the exhaustive list of exceptions for each Major Risk

Risks related to mechanical lifting and handling

- Manual handling (carrying loads, handling slings, etc.)

Risks of collision related to the presence of vehicles and pedestrians

- Commuting accident
- Maintenance activities on the vehicles
- Traffic accidents on the road during an occupational trip

Risks related to work at a height

- Fall of objects < 50 kg from any height < 2 floors or < 4 m
- Fall of objects with no one in the delineated exclusion zone at the time of the fall
- Fall of people from $\leq 1\text{ m}$ / 3 ft high
- Fall of a lifted load (such situations are addressed within "Lifting" major risk category)
- Fall from height of a person held by the harness with a 15 min rescue
- Fall of people or object or material resulting from an unstable or collapsed work (e.g. scaffolding collapse or formwork tipping over) (such situations are addressed within "Stability of works" major risk category)
- Fall of people on the level, fall while walking in stairs

Risks related to stability of works and storages

- Stability of loads which weight is < 50kg
- Fall of people or object from stable scaffolding (such situations are addressed within "Fall from height" major risk category)
- Demolition work with impacts limited to foreseeable consequences
- Manual handling of components (props, etc.)

Risks related to powered production equipment

- Hand tool (e.g: hammer or screwdriver)
- Non-production machines excluded (e.g., beverage dispenser)
- Handling and manipulation of hand tools

Risks related to hazardous energies

- Handling and manipulation of hand tools
