C	22-10-2024	F.MARTIN	I.LELIEVRE O.BRZEZINSKI	L.KNOLL	Modification of Hearing Protection Requirement

The Personal Protective Equipment (PPE) standards presented in this document aim to provide practical basis for defining the equipment to be used on site.

Table of contents

- 1. Mandatory PPE
- 2. PPE guides
- 3. Specific PPE

1. Mandatory PPE

PPE presented here shall be worn at all time :

Safety helmet with chinstrap

Safety glasses

Hearing protection
(To always carry with you)

Safety gloves

Retroreflective
Workwear

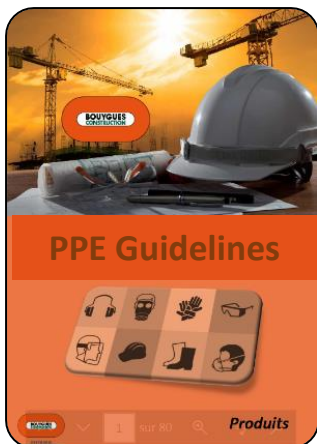

High safety shoes

The use of hearing protection is mandatory whenever the noise level in the environment exceeds 80 dB(A). This includes, but is not limited to, activities such as hammering, concrete vibration, demolition, pumping, injection, and being near construction equipment, machinery, or power tools.

2. PPE guides

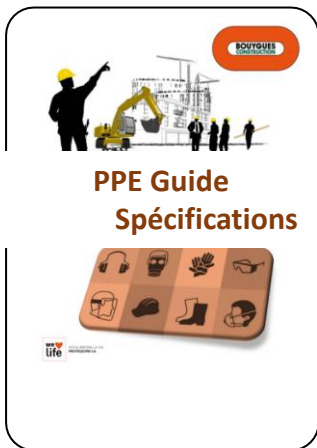

BYCN provides two PPE guides:

PPE guidelines :

Presents various standards protective equipment according to the activities to be carried out.

This document also presents the purchase order references for this equipment via the "Pablo" control software, when this is used/available.

PPE Guide Specifications:

Presents all the requirements and specifications for the choice of PPE.

Any PPE order is made on the basis of these minimum requirements.

These guides are available within BYCN and BYTP SharePoint.

3. Specific PPE

The specific PPE are defined according to the tasks to be carried out, and also taking into account the weather conditions (heat, cold, rain, sand, wind, etc.).

These are detailed in the dedicated Standards, linked to these activities, for example:

- Standard "Fall from height"
- Standard "Hot Work activity"
- Standard "Concrete activities"
- etc

In any cases, it is necessary to respect at least the specifications of the "PPE Specifications Guide" as basic criteria for the selection of PPE.
