

PROJECT MANAGEMENT TEAM

For a leadership in Safety

I am in charge of implementing BYTP's vision on Health & Safety all along the project and I lead by example through my daily actions.

I create the Health and Safety vision

- ✓ I carry out BYTP's Health & Safety vision throughout the project and I define its policy
- ✓ I provide every team member with clear requirements, roles, and responsibilities in relation to Health & Safety project policy

I maintain Safety Focus

- ✓ I include the Health & Safety Leader in the preparation and execution of construction activities and support him/her in his/her actions
- ✓ I stop (or do not allow) an activity when imminent danger or a non-compliance is identified
- ✓ I always make decisions and act with Health & Safety as my number one priority, especially when selecting subcontractors
- ✓ I allow the workers to participate to Health & Safety site visits implemented within my perimeter
- ✓ I must follow BYTP "Life-Saving Rules" applicable to my project
- ✓ I must detect any unforeseen event when it occurs

I influence and inspire others

- ✓ I own the Health & Safety vision of the project, share it and endorse it

I'm credible and trustworthy

- ✓ I lead by example, and I show consistency between words and actions
- ✓ I visit the project site regularly with my project Management team members (including subcontractors areas visits) and I always conduct a debriefing session after the visits

I'm «Team oriented»

- ✓ I encourage being attentive to potentially risky situations
- ✓ I encourage the sharing of successful Health & Safety experiences, challenges, improvement initiatives, etc.
- ✓ I intervene when someone is in danger and say «Stop»

I communicate effectively

- ✓ I communicate regularly to the construction teams on the importance to carry out work under safe conditions and I recall on the consequences of dangerous behaviors

I give feedback, recognition and apply fair sanctions if necessary

- ✓ I implement a "bottom-up" approach to analyze identified safety gaps and define corrective actions
- ✓ I develop and implement a reward / sanction scheme for the project

OUR VISION, ZERO SERIOUS AND FATAL ACCIDENTS
