1 Purpose

To describe the process and requirements for all inductions at all ALIGN sites and Offices. Included in the scope are the requirements for Supply Chain to induct their own employees and those of their own supply chain, ensuring essential health, safety, security and environmental information and instruction on the workplace is imparted.

2 Scope

This procedure applies to all Align undertakings for the HS2 programme. The information contained within this procedure can also be used as guidance for checking that sub-contractors/supply chain carrying out such activities are compliant.

- Health and Safety (Consultation with Employees) Regulations 1996

4 Definitions

Induction – The process of providing initial health, safety, security and environmental information, instruction and training to new employees and personnel new to the workplace.

Note: Induction is necessary beyond new employees or personnel new to the workplace, further induction may be necessary at different stages of the works/operations, or to individuals given increased or different responsibilities. The latter may take the form of a tool box talk, safety briefing or more formal training.

5 Governance

5.1 Responsibilities

5.1.1 The Project Lead

The Project Lead is responsible for ensuring that this procedure is implemented upon their project/area of works.

5.1.2 The Works Manager

The Works Manager is responsible for ensuring that every person working on the project or those visiting the project on a regular basis receive a site specific Induction, or if they are one-off visitors, they are escorted by a member of the team who have attended the full ALIGN site induction.

5.1.3 Other Personnel

In order to fulfil their responsibilities, the Works Manager may appoint other personnel to assist them. These persons will be responsible to the Works Manager for the implementation of section 5.1.2 above as applicable.

5.2 General

5.2.1 Induction

All personnel shall receive an induction when starting employment with ALIGN or when commencing work on a site, in an office, workshop or store yard. The induction shall be carried out prior to work commencing. The induction will be given by competent members of the ALIGN site management team and in accordance with guidance detailed within Appendix 1 to 3 of this procedure.

5.2.2 Competency

Those personnel appointed to carry out inductions will be competent to do so.

5.2.3 ALIGN Induction attendance record

On completion of an induction the ALIGN attendance register shall be completed by the provider and attendee(s).

5.2.4 Helmet Sticker

All personnel who have completed a Worker site induction will be issued with an induction helmet sticker to signify the individual has attended the ALIGN Worker Site Induction with the attended date being recorded.

5.3 Project Site Inductions (All Workers)

The ALIGN Worker Site Induction has been prepared in line with the Construction Phase Health and Safety Plan, Environmental Management Plan, Security Plan and other relevant Management Plans to ensure all site personnel, including attending plant fitters, electricians and similar trades, are provided with adequate information to safe guard their Health and Safety whilst working upon the operational site. The ALIGN Worker induction will be updated as the project grows to ensure delivered material is current to the stage of the project.

In addition to the above ALIGN Worker Site Induction all site based personnel will attend the HS2 Safety Induction/Workshop at the next scheduled presentation. Such Workshops for the initial GI works are scheduled upon a fortnightly basis.

5.3.1 Project Visitors Inductions

The ALIGN Site Visitors Induction has been prepared in line with the Construction Phase Health and Safety Plan to ensure all site visitors are provided with adequate information to safe guard their Health and Safety whilst visiting the operational site. The ALIGN visitors

induction will be updated as the project grows to ensure delivered material is current to the stage of the project. Visitors will be fully escorted and restricted from undertaking any works.

5.3.2 Project Delivery Drivers Briefing/Inductions

The ALIGN Delivery Drivers Briefing/Induction has been prepared in line with the Construction Phase Health and Safety Plan to ensure all delivery drivers are provided with adequate information to safe guard their Health and Safety whilst delivering goods/removing goods from any ALIGN Project Site. The ALIGN Delivery Drivers Briefing/Induction will be updated as the project grows to ensure delivered material is current to the stage of the project. The ALIGN Delivery Drivers Briefing/Induction will be delivered by Gate Persons/Security Guards.

5.3.3 Office Inductions

The ALIGN Office/Offices Induction has been developed to ensure persons working within ALIGN Offices are provided with adequate information to safe guard their Health and Safety whilst working within any ALIGN Office.

5.3.4 Office Visitors Induction

Persons attending an ALIGN Office less than 2 times in a month are permitted to sit the ALIGN Office Visitors Induction which will be delivered by their host and provided adequate information to safe guard their Health and Safety whilst visiting the relevant ALIGN Office.

Type of Induction	Applicable to
Office Visitors Induction	Persons visiting an ALIGN Office less than 2 times in a month.
ALIGN Office Induction	Persons visiting or working from an ALIGN Office more than 2 times in a month
Delivery Drivers Briefing/Induction	Persons delivering or collecting from an ALIGN Site, store yard or workshop
Project Visitors Induction	Site visitors not attending site no more than 2 times a month
Project Site Induction	All personnel working upon or attending site more than 2 times a month as a regular visitor.

Type of Induction	Applicable to
HS2 Safety Induction/Workshop	All personnel working upon or attending site more than 2 times a month as a regular visitor.

6 Training

All persons carrying out inductions shall have sufficient experience in presenting the induction material to the target audience, if further guidance is required the Align Safety Team will provide or arrange training/support.

Similarly, sub-contractors are required to ensure that their employees and their supply chain employees are inducted upon their own company induction and task specific RAMs prior to attending the ALIGN site induction. Align Management will periodically monitor sub-contractor induction records and induction delivery.

7 Documentation

The following shall be retained in accordance with Flow Charts within Appendix 1 to 3 dependent upon role:

- ALIGN Induction attendance sheets
- Employees/Employers Declaration
- Operatives Employment Competence Certificates
- Copies of Individuals current skill cards
- Individuals evidence of Pre Placement Health Questionnaire (Park Health) confirming individuals are:
 - 1- Fit to Work
 - 2- Fit with restrictions
 - 3- Currently not fit to work
- Safety Critical Workers Fit to Work - see induction flow charts.

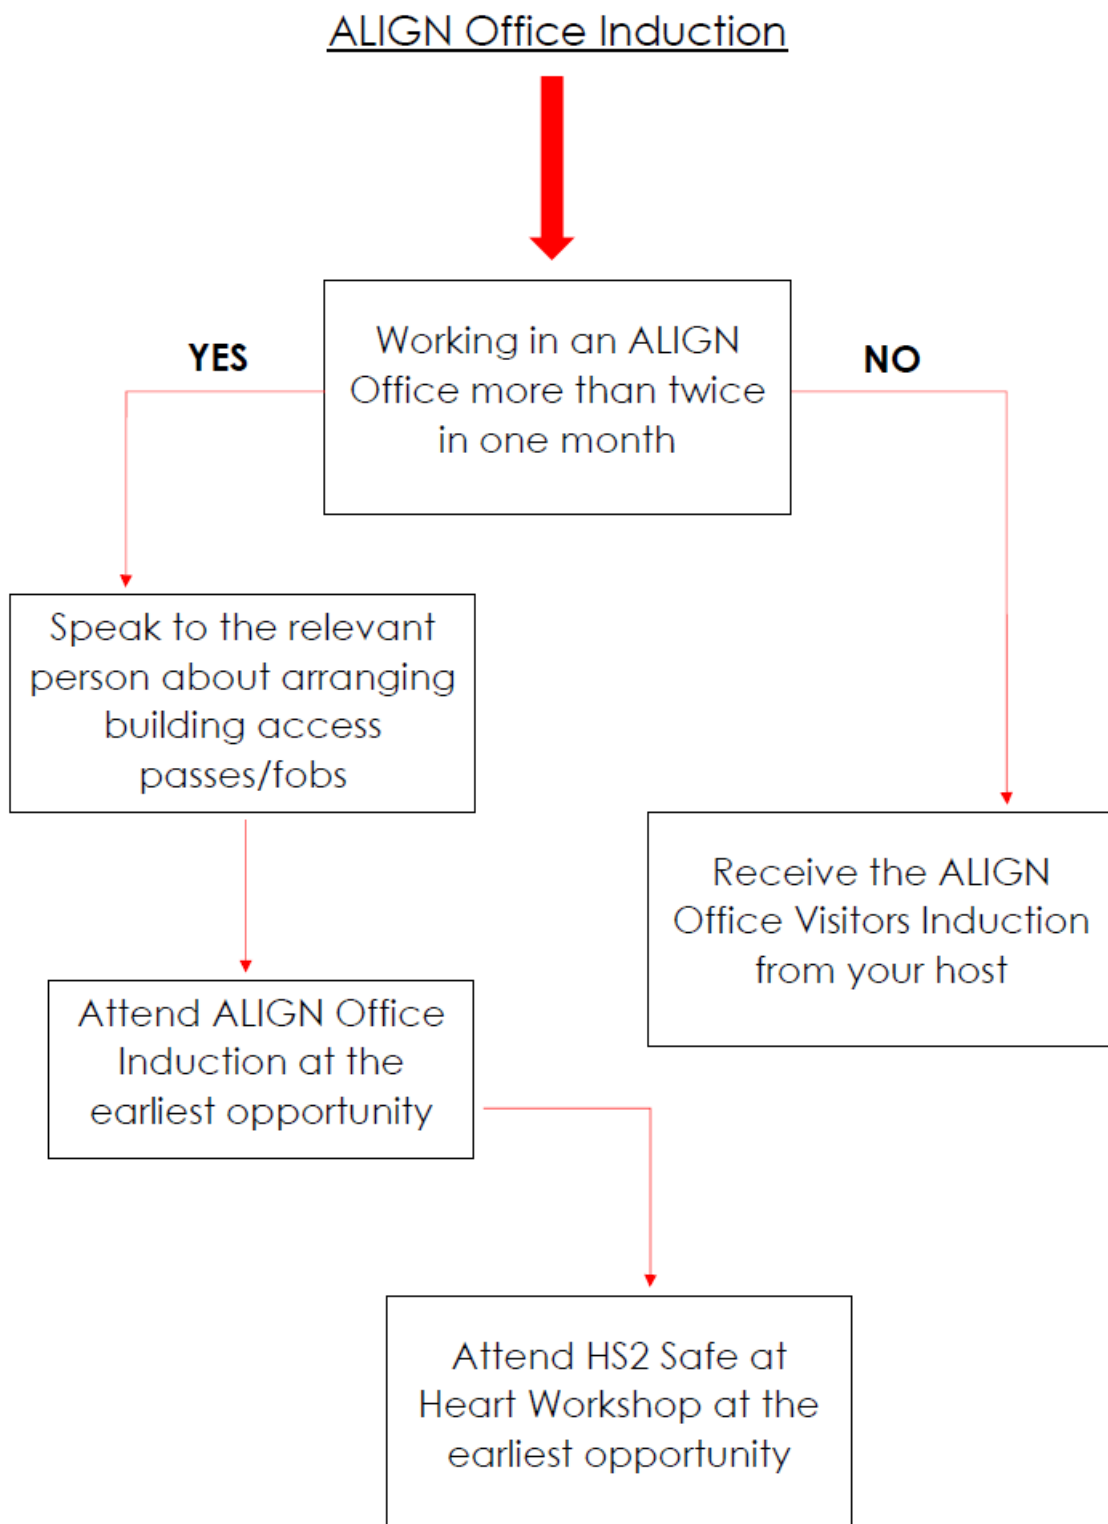

Safety Critical Worker is defined as:

A Safety Critical, a safety critical worker is any person who, if incapacitated during the course of their task;

- *has the potential to cause a significant safety risk to others and/or;*
- *due to the environment in which the task is undertaken, may put themselves at significant risk of harm.*
