Supervisors Safety Induction

AGENDA

INTRODUCTIONS

WHY YOU ARE IMPORTANT TO US

ROLES AND RESPONSIBILITIES OF A SUPERVISOR

SAFE SYSTEMS OF WORK

CONTRACTORS HEALTH AND SAFETY STANDARDS

BEHAVIOURS: SAFETY LEADERSHIP PROGRAMME

PERFORMANCE AND COMMITMENT

Supervisors Safety Induction

AIM OF THIS PRESENTATION

- ✓ To identify the roles and responsibilities of being a Supervisor on any ALIGN site
- ✓ To examine the ALIGN standards and expectations and the importance of delivering these
- ✓ To obtain an overview of how to develop front-line Supervisors skills to lead and direct incident and injury-free work
- ✓ To gain an insight into open and effective communication and how we act as an integrated team

Supervisors Safety Induction

WHY YOU ARE IMPORTANT TO US

- Most of ALIGN work is undertaken by subcontractors
 - Our performance is dependant on our supply chain, i.e. **YOU**
 - Our reputation is dependant on **YOU**
 - Our Health and Safety performance is dependant on **YOU**
 - Our continued work and reputation is dependant on **YOU**
 - You are important to us - **Because you are the key to our success!**
 - Site Management and Supervision is incredibly important because the position they hold means they can have the most influence on their teams
 - The ALIGN Site Management team include Spike Deighton and Chris Winters, supported by a team of advisors and department heads
-

Supervisors Safety Induction

WHY YOU ARE IMPORTANT TO US

**ALIGN
core
values**

We need you to implement these Core Values throughout your teams.

Supervisors Safety Induction

ROLES & RESPONSIBILITIES OF A SUPERVISOR

Who is a Supervisor?

- An individual with responsibility for the work of others on a day to day basis or who has authority to direct others on site...
- A supervisor has the correct training (SSSTS or equivalent), experience, knowledge, skills and most importantly attitude, to put others to work, safely.

Supervisors Safety Induction

ROLES & RESPONSIBILITIES OF A SUPERVISOR

What is the role of a supervisor?

A supervisor should bring together workers, materials and plant, and oversee/supervise the planned work:

- In accordance with agreed risk assessments and method statements
- Efficiently and to the approved standards...**safely!**
- In accordance with relevant permits and temporary works designs
- Attend the daily Black Hat Meeting

On ALIGN sites there should be a minimum of adequate supervision for works in progress.

Supervisors Safety Induction

ROLES & RESPONSIBILITIES OF A SUPERVISOR

Where do you fit in?

Supervisors Safety Induction

ROLES & RESPONSIBILITIES OF A SUPERVISOR

Work must not commence if it can't be done safely.

As stated, it is non-negotiable – **Your Safety** comes at the top of our priority list and should not be compromised under any circumstances.

If you believe we are asking you to do something that is wrong, stop and tell us - do not walk by unsafe acts and conditions.

Supervisors Safety Induction

ROLES & RESPONSIBILITIES OF A SUPERVISOR

What We Expect From You

- ✓ Lead by example with a committed approach to Health & Safety
- ✓ Organise, manage, plan your work in line with the programme
- ✓ Be approachable, responsive and communicate clearly and effectively
- ✓ Be motivated and have the ability to motivate others to work safe
- ✓ Understand how you manage and control risk for your tasks
- ✓ Do not start work if unsafe to do so
- ✓ Inform, instruct and set persons to work in safety - both in areas & systems
- ✓ Contribute in meetings, inspections, enforcing rules, TBT, initiatives
- ✓ Ensure Competence of all workers

Supervisors Safety Induction

ROLES & RESPONSIBILITIES OF A SUPERVISOR

What you can Expect From ALIGN

ALIGN and your company will support you and are fully committed to a safe site.

We want to help you to achieve this by:

- ✓ Holding regular Health and Safety meetings with you
- ✓ Listening and, where appropriate, taking action on your concerns
- ✓ Working with you in co-ordinating our activities on site to create a safer working environment
- ✓ Providing you with regular feedback on your queries and concerns
- ✓ Involving you in project briefings and initiatives

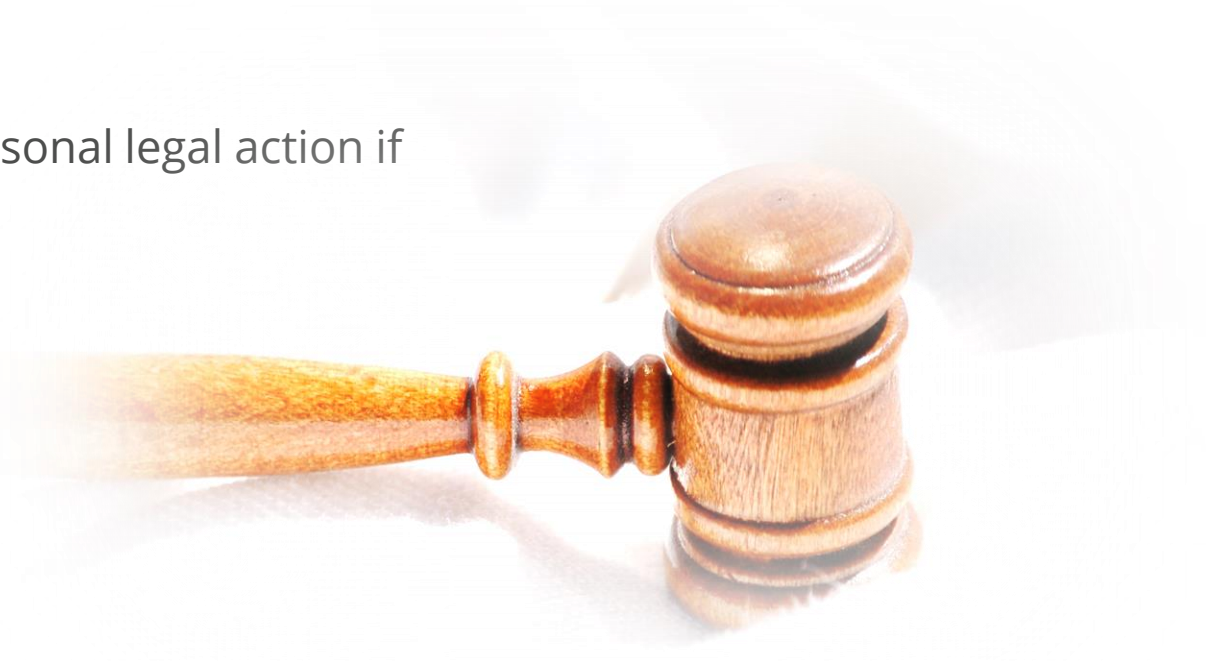

Supervisors Safety Induction

ROLES & RESPONSIBILITIES OF A SUPERVISOR

The Legal Bit

As an individual (Supervisor), YOU could be subject to personal legal action if you knowingly:-

- Allow work to start on unplanned activities
- Set operatives to work in unsafe areas
- Use untrained/unskilled workers
- Use uncertified, unsafe, plant/equipment
- Do not inform and instruct on safe systems and controls
- Condone breaches of site rules and legal requirements
- Do not react to unsafe acts and conditions

Supervisors Safety Induction

ROLES & RESPONSIBILITIES OF A SUPERVISOR

Supervisors Activities

- ✓ Daily Inductions
- ✓ Daily Task Briefings/POWRA
- ✓ Arrange permits – hot works, excavations etc.
- ✓ Brief Risk Assessments/Method Statements
- ✓ Daily Inspections
- ✓ Ensure Safe Working Practice
- ✓ Co-ordinate with others
- ✓ Assist Workforce to Achieve Compliance
- ✓ Daily Supervisors/Black Hat meetings
- ✓ Always Lead by Example
- ✓ Mobilisation checklist (must be in place and signed off)

Supervisors Safety Induction

SAFE SYSTEMS OF WORK

ALIGN Management, our Supply Chain and all supervisors are legally and morally responsible for keeping people safe from the consequences of our work.

We must:

- ✓ **Plan** our work carefully
- ✓ **Identify risk** to minimise risk (as far as is reasonable)
- ✓ **Prepare Safe Systems of Work** – Method Statements/Task Sheets
- ✓ **Explain** the Safe Systems of Work clearly to our workforce
- ✓ **Supervise** work to ensure it is being carried out correctly - including the works of your sub contractors

Supervisors are our direct link with the workforce – if that link fails, the whole system can fail!

Supervisors Safety Induction

SAFE SYSTEMS OF WORK

Planning work for safety

- Programmes should allow sufficient time to carry out work safely
- Advanced planning includes:
 - ☐ Access and egress arrangements
 - ☐ Track matting arrangements
 - ☐ Traffic Management
 - ☐ Mobilisation checklist
- Never take short cuts – always work to the agreed methods

Identifying risk

- **The law requires us to identify risk then eliminate or reduce it**
 - Supervisors assess risk and act to reduce it every day – even if it is not recorded formally or thought of as risk assessment
-

Supervisors Safety Induction

SAFE SYSTEMS OF WORK

Method statements & task sheets

- **We must prepare and apply Safe Systems of Work**
 - On ALIGN Sites the Safe System of Work takes the form of a Method Statement, which can be written or visual (drawings or photos of each step of the task).
 - For complicated operations the Method Statements can be broken down into Task Specific Briefings.
 - If you are supervising the work you should be involved in preparing the Safe System of Work and understand the status of such documentation.
- **Communication of safe systems of work**
 - Check the method statement, ensure it is valid and details how the work will be undertaken
 - Prepare any task briefings
 - Communicate and most importantly **check** understanding and compliance

Supervisors Safety Induction

SAFE SYSTEMS OF WORK

Supervision to ensure safe working

- As a Supervisor you must ensure work is carried out to the agreed methods
- You should continually check the work place
- If any change is needed – STOP!
- Record what you have seen and done
- If a method of work changes make sure the Method Statement is updated

Constant Supervision is Vital.

Supervisors Safety Induction

CONTRACTORS HEALTH & SAFETY STANDARDS

Each member of our Supply Chain has their own Safety Management System, and their own standards. You should be aware of, and implement, the requirements of your employers Safety Management System.

However, the requirements of the ALIGN Safety Management System takes precedent and where our procedures have stricter, or require additional, control measures over and above your own systems you must comply with these requirements.

The aim is to provide you and your workforce with an industry leading, safe, efficient, consistently excellent and pleasant place to work.

We want you to want to work on a ALIGN site. We can only achieve this with your help.

Supervisors Safety Induction

BEHAVIOURS – SAFETY LEADERSHIP PROGRAMME

What is the Safety Leadership Programme?

The Safety Leadership Programme is the ALIGN “Culture Change Programme”

We recognise that people involved in accidents don’t generally go to work to get hurt, however they can be, amongst other things

- Put in an unsafe situation
- They can make an unsafe decision
- They can believe that unsafe working practices are acceptable

We all have a role to play in ensuring that everyone not only takes responsibility for their own safety, but also for those around them.

The supervisors are key to ensuring that we meet the aims of the Safety Leadership Programme, **elimination of all worker injury.**

Supervisors Safety Induction

BEHAVIOURS – SAFETY LEADERSHIP PROGRAMME

How does the Safety Leadership Programme affect you?

- Workforce Engagement Workshop is in the process of being developed with the aim of everyone attending such a workshop within 2 weeks of starting on site. This is how we explain to everyone the Safety Leadership Programme means.
- All supervisors should attend a daily coordination meeting, either with the ALIGN Works Manager (Black Hat Meeting) or with their own Site Manager where he will tell them what ALIGN have said.
- All operatives will attend a Daily Activity Briefing with their Supervisor
- All accidents, near misses and unsafe situations need to be reported so they can be investigated, corrected and learned from.
- If you have not received a DAB, do not have a M/S or R/A, the situation has changed, the working methods or location is unsafe then works must stop.
- Ensure permit conditions are established and maintained
 - Permit to Break Ground
 - Permit to Cross Over/Under Services

We need you to help make sure this happens

Supervisors Safety Induction

BEHAVIOURS – SAFETY LEADERSHIP PROGRAMME

It's not all one way. To achieve our aims we need to help and support you.

You can rely on ALIGN to:

- ✓ Support you in health and safety initiatives and promotions
- ✓ Encourage you to express your views on health and safety issues
- ✓ Listen to all your suggestions
- ✓ Respect you as a competent person
- ✓ Provide you with the support you need from the project management team to help you deliver these objectives
- ✓ Regard you as a highly valued member of the site management team

Supervisors Safety Induction

BEHAVIOURS – SAFETY LEADERSHIP PROGRAMME

Our Commitment to Safety

- ✓ The people that work on our sites work safe and go home safe
- ✓ Safety Conscious Workforce with Competent Supervision
- ✓ Preventing Accidents and Incidents
- ✓ Having good Quality Welfare
- ✓ Open Door Policy

Supervisors Safety Induction

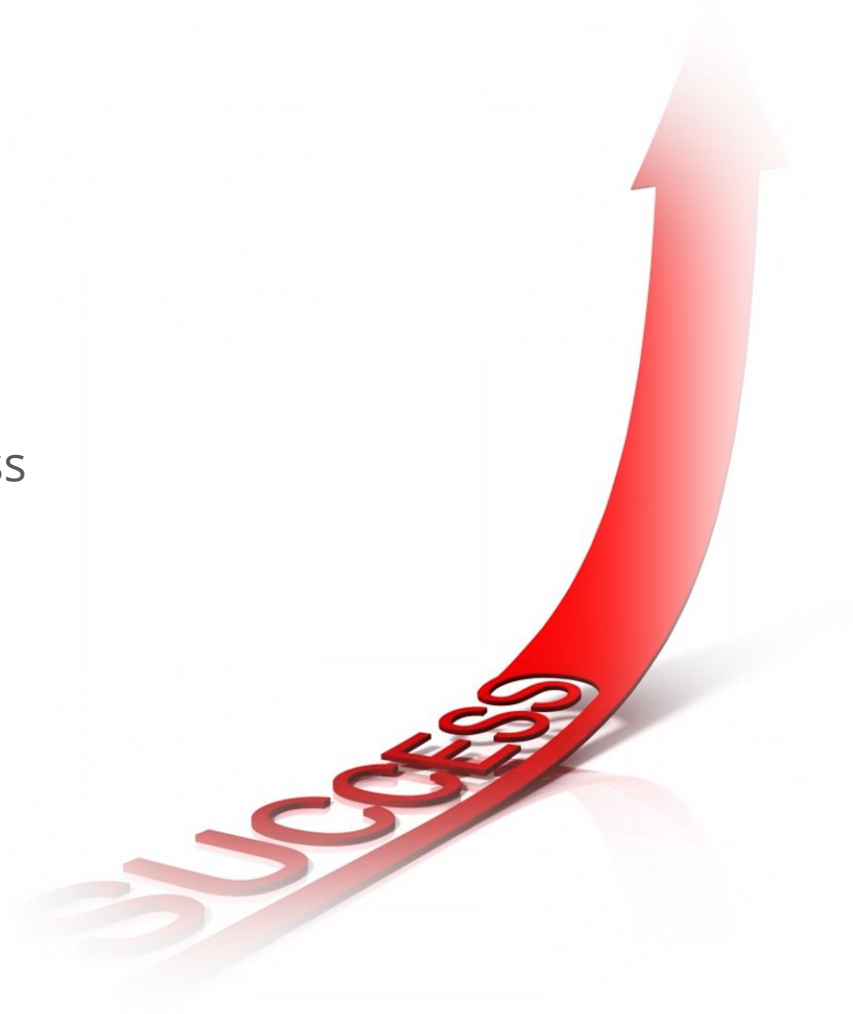

BEHAVIOURS – SAFETY LEADERSHIP PROGRAMME

Performance monitoring

- Poor performance will need to be addressed. Remember you are responsible for the actions of your workforce.
- Good performers get recognised, your company get repeat business and you get asked for.
- Monthly Supply Chain Awards

Quality

- Repeat work costs money, time and reputation
- Inspection and Test Plans
- Handover Sheets
- Don't walk by!

Supervisors Safety Induction

CONCLUSION

The aims of this presentation were:-

- ✓ To identify the roles and responsibilities of being a Supervisor on a ALIGN site
- ✓ To examine the ALIGN standards and expectations and the importance of delivering these
- ✓ To obtain an overview of how to develop front-line Supervisors skills to lead and direct incident and injury-free work
- ✓ To gain an insight into open and effective communication and how we act as **One Team**

I believe we have achieved these Aims.

Supervisors Safety Induction

Any Questions?

Supervisors Safety Induction

SUMMARY

Nothing that **you** do, as a **Supervisor**, is so important that you cannot take the time to do it safely.

Are you prepared to support us in these objectives?
